

NOTE TO USERS

Activation Instructions for National Instruments Software

Your National Instruments software requires activation in order to access all features. Activation is simple and you can activate your software 24 hours a day, 7 days a week.

1 Install your software.

2 Locate your serial number.

Your serial number uniquely identifies your purchase of NI software. You can find it on the *Certificate of Ownership* included in your software kit. If you subscribe to NI Developer Suite or Academic Software Solutions, use the original serial number you received with your initial purchase.

3 Launch the License Activation Wizard.

Launch your software and choose to activate when prompted.

OR

Perform the following steps if you do not receive a prompt:

- Launch the NI License Manager by selecting **Start»Programs»National Instruments»NI License Manager**.
- Click the **Activate** button on the toolbar.

The wizard will guide you through the activation process.

Note If you are a DIAdem user and are activating DIAdem add-ons, such as DIAdem CLIP, DIAdem INSIGHT, or DIAdem Crash Analysis Toolkit, select **?»Activate License**. You must activate these add-ons separately in addition to any other DIAdem licenses.

4 Save your activation code for future use (optional).

You can move this software to another computer or reactivate it at any time. If you need to reinstall this software on the same computer, the activation wizard provides you with the option to receive an email confirmation of your activation code. To apply this activation code in the future, launch the Activation Wizard and choose to apply a 20-character activation code.

For more information on activation, refer to your product documentation, or visit ni.com/activate.

National Instruments uses activation to better support evaluation of our software, to enable additional software features, and to support license management in large organizations. To find out more about National Instruments software licensing, visit ni.com/activate to find frequently asked questions, resources, and technical support.

Terms

Serial Number	An alphanumeric string that uniquely identifies your purchase of a single copy of software, included in your software kit on your <i>Certificate of Ownership</i> . The serial number for hardware products is printed either on the product box or on the device.
Computer ID or Device ID	A 16-character ID that uniquely identifies your computer or NI hardware, generated during the activation process.
Activation Code	A 20-character code that enables NI software to run on your computer, based on your serial number and computer ID. You generate and install an activation code by completing the activation process.

Moving Software After Activation

To transfer your software to another computer, install and reactivate it on the second computer. You will not be prohibited from transferring your software from one computer to another.

Volume License Program

National Instruments offers volume licenses through the NI Volume License Program. The NI Volume License Program makes managing software licenses and maintenance easy. For more information, refer to ni.com/vlp.

Online Activation

Activation is available on ni.com/activate 24 hours a day, 7 days a week. NI does not require that the computer on which you run NI software have Internet or email access. You can retrieve an activation code from any computer that does have an Internet connection.

Home Computer Use

National Instruments permits you to use this software at home. Refer to the NI License Manager help file or the software end-user license agreement in the installer or online at ni.com/legal/license for more information.

Privacy Policy

National Instruments respects your privacy. For more information about the National Instruments activation information privacy policy, go to ni.com/activate/privacy.
