Ni-SERIAL Supported Interfaces

The PCI interfaces listed in Table 1 are universal cards which accept either 3.3 or 5 volts.

* All NI serial hardware supports standard baud rates. In addition, the PCI/NI PCIe/PXI-843x family of hardware supports any baud rate from 2 baud up to the maximum supported baud rate for that interface. All baud rates are supported because the UART can get within 1.3 percent of all baud rates in that range.

† Serial connector cables end in DB-9 male serial connectors.

‡ The two-wire auto control mode for RS-485 transceiver control has a maximum baud rate of 2000 kbaud.

</tr>
</tbody>
</table>

* All NI serial hardware supports standard baud rates. In addition, the PCI/NI PCIe/PXI-843x family of hardware supports any baud rate from 2 baud up to the maximum supported baud rate for that interface. All baud rates are supported because the UART can get within 1.3 percent of all baud rates in that range.
National Instruments considers the following baud rates to be standard. NI serial hardware supports these rates up to the maximum rate specified. Your device may also support additional baud rates not listed below:

<table>
<thead>
<tr>
<th>Baud Rate</th>
<th>Value</th>
</tr>
</thead>
<tbody>
<tr>
<td>300</td>
<td>2400</td>
</tr>
<tr>
<td></td>
<td>14400</td>
</tr>
<tr>
<td></td>
<td>57600</td>
</tr>
<tr>
<td></td>
<td>460800</td>
</tr>
<tr>
<td>600</td>
<td>4800</td>
</tr>
<tr>
<td></td>
<td>19200</td>
</tr>
<tr>
<td></td>
<td>115200</td>
</tr>
<tr>
<td>1200</td>
<td>9600</td>
</tr>
<tr>
<td></td>
<td>38400</td>
</tr>
<tr>
<td></td>
<td>230400</td>
</tr>
</tbody>
</table>

To set the baud rate, set the VISA Baud attribute or use the Windows SetCommState function and pass the actual value of the baud rate in the BaudRate field of the DCB structure.

Refer to Hardware Specifications for supported baud rates on each board.
Serial Hardware Features

<td>Indicates the serial ENET interface is receiving Ethernet network traffic.</td>
</tr>
<tr>
<td>PORT x</td>
<td>Indicates which serial ports are open.</td>
</tr>
</tbody>
</table>

Figure 2. Four-Port Serial ENET Hardware LEDs

ENET PWR/RDY LED Signaling

This section describes how to interpret the PWR/RDY LED error codes.

The PWR/RDY LED has several purposes on the serial ENETs. When you first power on the unit, the PWR/RDY LED alternates rapidly between red and yellow while it completes its power-on self-tests and acquires network parameters. When the tests complete successfully and the IP address is assigned from either nonvolatile memory or the network, the PWR/RDY LED remains steady yellow, indicating that the unit is ready to operate.
The **PWR/RDY** LED also alternates rapidly between red and yellow while the device is in network configuration mode. At other times, the **PWR/RDY** LED blinks slowly in a recognizable pattern to alert you of internal errors. Use the following steps to interpret and record the pattern that the **PWR/RDY** LED flashes, and then contact National Instruments.

![Note](image)

**Note**  By recording the **PWR/RDY** LED error messages before calling National Instruments, you can save yourself time, and customer support can answer your questions more accurately and efficiently. Do not switch off power to your serial ENET before recording the flashing **PWR/RDY** LED pattern.

**PWR/RDY** LED signaling can report up to 81 different errors. The errors are numbered from 11 to 99 and are reported through sequences of **PWR/RDY** LED flashes.

![Note](image)

**Note**  There is no zero in any error message. This means that error message numbers 0-10, 20, 30, 40, 50, 60, 70, 80, and 90 are not possible.

**Step 1. Count the Long Flashes**

A three-second interval, during which the **PWR/RDY** LED is yellow, separates each repetition of the sequence. The sequence begins with a series of long one-second flashes—that is, one second red, one second yellow. These long flashes represent the digit in the tens column. There can be one to nine long flashes, which represent digits 1 through 9. For example, one long flash represents the digit 1 in the tens column, and nine long flashes represent the digit 9 in the tens column.

**Step 2. Count the Short Flashes**

The long flashes are followed by shorter flashes; each short flash lasts about one-fifth of a second—that is, one-fifth of a second red, one-fifth of a second yellow. These short flashes represent the digit in the ones column. Again, there can be one to nine flashes, which represent the digits 1 through 9. For example, one short flash represents the digit 1 in the ones column, and nine short flashes represent the digit 9 in the ones column.

Using this method, the **PWR/RDY** LED flashes the following sequence to represent error message 11:

<three seconds yellow> <one long red flash> <one short red flash> <three seconds yellow>...

The **PWR/RDY** LED flashes the following sequence to represent error message 31:

<three seconds yellow> <three long red flashes> <one short red flash> <three seconds yellow>...

**Step 3. Record Your Error Message Number**

When you have computed your error message number, write it down and also note the ON/OFF state of the **LINK**, **TX**, and **RX** LEDs. Have this information available when calling National Instruments.

Hardware Specifications

NI 9870 RS-232 C-Series Module

C-Series modules are for use with the NI CompactRIO platform. For complete module and system specifications, refer to the NI 9870 Operating Instructions and Specifications.

Specifications

The following specifications are typical for the range -40 to 70 °C unless otherwise noted.

Maximum baud rate ..........................................921.6 kbps

The NI 9870 supports arbitrary baud rates according to the following equation:

\[
\text{BaudRate} = \frac{3.6864 \text{ Mbps}}{(\text{Prescaler} \times \text{Divider})}
\]

*Prescaler* can be (4..65535).

*Divider* can be 1 or 4.

As long as the actual baud rate is within 2% of the desired baud rate, communication errors should not happen.

Maximum cable length .....................................250 pF equivalent

\[ \text{Note} \quad \text{Cable capacitance greater than 250 pF may adversely affect the maximum baud rate and thermal dissipation.} \]

Maximum RS232 Receive signal
(RXD, CTS, DSR, DCD, RI)
Continuous Voltage...........................................±8 V

\[ \text{Note} \quad \text{Continuous RS232 input voltages in excess of ±8 V may cause excessive thermal dissipation.} \]

Data line ESD protection
(human body model).................................±15 kV

MTBF ..........................................................448,008 hours at 25 °C; Bellcore Issue 6, Method 1, Case 3, Limited Part Stress Method

\[ \text{Note} \quad \text{Contact NI for Bellcore MTBF specifications at other temperatures or for MIL-HDBK-217F specifications.} \]

Power Requirements

Power consumption from chassis

<table>
<thead>
<tr>
<th>Mode</th>
<th>Power Consumption</th>
</tr>
</thead>
<tbody>
<tr>
<td>Active</td>
<td>0.5 W max</td>
</tr>
<tr>
<td>Sleep</td>
<td>50 μW max</td>
</tr>
</tbody>
</table>

|
Thermal dissipation (at 70 °C)
- Active mode .............................................. 1.5 W max
- Sleep mode .............................................. 0.5 W max

Required external supply voltage range ($V_{\text{SUP}}$) ........................................... +8 to +28 VDC

Power supply consumption from external supply $V_{\text{SUP}}$
- Typical ...................................................... 0.5 W
- Maximum .................................................. 2 W

**Physical Characteristics**

If you need to clean the module, wipe it with a dry towel.

Weight ............................................................... Approx. 154 g (5.4 oz)

**Safety**

**Maximum Voltage**

Connect only voltages that are within these limits.

- RS232 Receive Signal-to-COM (RXD, CTS, DSR, DCD, RI) ........................................... ±25 V max,
  Measurement Category I

- RS232 Transmit Signal-to-COM (TX, RTS, DTR) ............................................... ±13.2 V max,
  Measurement Category I

- $V_{\text{SUP}}$-to-COM ................................................... ±28 V max,
  Measurement Category I

Measurement Category I is for measurements performed on circuits not directly connected to the electrical distribution system referred to as MAINS voltage. MAINS is a hazardous live electrical supply system that powers equipment. This category is for measurements of voltages from specially protected secondary circuits. Such voltage measurements include signal levels, special equipment, limited-energy parts of equipment, circuits powered by regulated low-voltage sources, and electronics.

**Caution** Do not connect to signals or use for measurements within Measurement Categories II, III, or IV.

---

1 The maximum voltage that can be applied or output without creating a safety hazard.
Isolation Voltages
Port-to-earth ground
Withstand ..............................................1000 V_{rms}, verified by a 5 s dielectric withstand test
Continuous ........................................60 VDC, Measurement Category I

Shock and Vibration
To meet these specifications, you must panel mount the CompactRIO system.
Operating vibration, random (IEC 60068-2-64) ..................5 g\_rms, 10 to 500 Hz
Operating shock (IEC 60068-2-27) ..........................30 g, 11 ms half sine, 50 g, 3 ms half sine, 18 shocks at 6 orientations

Operating vibration, sinusoidal (IEC 60068-2-6) ..................5 g, 10 to 500 Hz

Environmental
CompactRIO modules are intended for indoor use only. For outdoor use, mount the CompactRIO system in a suitably rated enclosure. Refer to the installation instructions for the chassis you are using for more information about meeting these specifications.
Operating temperature .................................-40 to 70 °C
Storage temperature ......................................-40 to 85 °C
Ingress protection ........................................IP 40
Operating humidity .....................................10 to 90% RH, noncondensing
Storage humidity ........................................5 to 95% RH, noncondensing
Maximum altitude ......................................2,000 m
Pollution Degree (IEC 60664) ..........................2
NI 9871 RS-485 C-Series Module

C-Series modules are for use with the NI CompactRIO platform. For complete module and system specifications, refer to the NI 9871 Operating Instructions and Specifications.

Specifications

The following specifications are typical for the range -40 to 70 °C unless otherwise noted.

Maximum baud rate: 3.6864 Mbps

The NI 9871 supports arbitrary baud rates according to the following equation:

\[
\text{BaudRate} = \frac{3.6864 \text{ Mbps}}{(\text{Prescaler} \times \text{Divider})}
\]

\(\text{Prescaler}\) can be (4..65535).

\(\text{Divider}\) can be 1 or 4.

As long as the actual baud rate is within 2% of the desired baud rate, communication errors should not happen.

Maximum cable length: 1.2 km (4,000 ft)

Data line ESD protection (human body model): ±15 kV

MTBF: 514,016 hours at 25 °C; Bellcore Issue 6, Method 1, Case 3, Limited Part Stress Method

Note: Contact NI for Bellcore MTBF specifications at other temperatures or for MIL-HDBK-217F specifications.

Power Requirements

Power consumption from chassis

- Active mode: 0.5 W max
- Sleep mode: 50 µW max

Thermal dissipation (at 70 °C)

- Active mode: 1.5 W max
- Sleep mode: 55 mW max

Required external supply voltage range (\(V_{\text{SUP}}\)): +8 to +28 VDC

Power supply consumption from external supply \(V_{\text{SUP}}\)

- Typical: 1 W
- Maximum: 3.5 W
Physical Characteristics
If you need to clean the module, wipe it with a dry towel.
Weight ...............................................................Approx. 153 g (5.4 oz)

Safety

Maximum Voltage
Connect only voltages that are within these limits.
- RS485/RS422 Port-to-COM ..............................-8 to +13 VDC max, Measurement Category I
- $V_{SUP}$-to-COM ..............................................±28 V max, Measurement Category I

Measurement Category I is for measurements performed on circuits not directly connected to the electrical distribution system referred to as MAINS voltage. MAINS is a hazardous live electrical supply system that powers equipment. This category is for measurements of voltages from specially protected secondary circuits. Such voltage measurements include signal levels, special equipment, limited-energy parts of equipment, circuits powered by regulated low-voltage sources, and electronics.

Caution  Do not connect to signals or use for measurements within Measurement Categories II, III, or IV.

Isolation Voltages
Port-to-earth ground
- Withstand ..................................................1000 V$_{max}$, verified by a 5 s dielectric withstand test
- Continuous .................................................60 VDC, Measurement Category I

Shock and Vibration
To meet these specifications, you must panel mount the CompactRIO system.
- Operating vibration, random (IEC 60068-2-64) ......................5 g$_{max}$, 10 to 500 Hz
- Operating shock (IEC 60068-2-27) ..........................30 g, 11 ms half sine, 50 g, 3 ms half sine, 18 shocks at 6 orientations

1  The maximum voltage that can be applied or output without creating a safety hazard.
Environmental
CompactRIO modules are intended for indoor use only. For outdoor use, mount the CompactRIO system in a suitably rated enclosure. Refer to the installation instructions for the chassis you are using for more information about meeting these specifications.

Operating temperature ...................................... -40 to 70 °C

Pollution Degree (IEC 60664) ....................... 2

PCI Serial Hardware
This section describes the characteristics of the PCI serial hardware and the recommended operating conditions.

PCI-843x Series Hardware

PCI-8430/2 (RS-232) and PCI-8431/2 (RS-485/422)

Dimensions ....................................................... 10.67 × 14.22 cm
(4.2 × 5.6 in.)
I/O connector .................................................... DB-9 male connector
Power requirement (from PCI channel)
PCI-8430/2
+5 VDC............................................. 325 mA typical
500 mA maximum
PCI-8431/2
+5 VDC............................................. 500 mA typical
700 mA maximum

Weight
PCI-8430/2 ................................................ 88 g
PCI-8431/2 ................................................ 92 g

Maximum baud rate
PCI-8430/2 ................................................ 1 Mbps
PCI-8431/2 ................................................ 3 Mbps
Boards support any baud rate from 2 baud up to the maximum.
PCI-8430/4 (RS-232) and PCI-8431/4 (RS-485/422)

Dimensions ....................................................... 10.67 × 14.22 cm
                                                      (4.2 × 5.6 in.)

I/O connector¹ ................................................... 10-position modular jack (10P10C)

Power requirement (from PCI channel)
  PCI-8430/4
    +5 VDC .................................................. 400 mA typical
                                                  600 mA maximum
  PCI-8431/4
    +5 VDC .................................................. 725 mA typical
                                                  1.1 A maximum

Weight
  PCI-8430/4 .................................................. 99 g
  PCI-8431/4 .................................................. 102 g

Maximum baud rate
  PCI-8430/4 .................................................. 1 Mbps
  PCI-8431/4 .................................................. 3 Mbps

Boards support any baud rate from 2 baud up to the maximum.

PCI-8430/8 (RS-232) and PCI-8431/8 (RS-485/422)

Dimensions ....................................................... 10.67 × 14.48 cm
                                                      (4.2 × 5.7 in.)

I/O connector² ................................................... 68-pin, SCSI type connector

Power requirement (from PCI channel)
  PCI-8430/8
    +5 VDC .................................................. 600 mA typical
                                                  900 mA maximum
  PCI-8431/8
    +5 VDC .................................................. 1.3 A typical
                                                  1.9 A maximum

¹ The four-port PCI serial boards require cables, included in your kit, to convert the 10-position modular jacks (10P10C) to DB-9 male connectors.

² The eight-port PCI serial boards require a cable, included in your kit, to convert the 68-pin connector to eight DB-9 connectors.
Weight
PCI-8430/8................................................ 84 g
PCI-8431/8................................................ 85 g

Maximum baud rate
PCI-8430/8................................................ 1 Mbps
PCI-8431/8................................................ 3 Mbps

Boards support any baud rate from 2 baud up to the maximum.

**PCI-8430/16 (RS-232)**
Dimensions ....................................................... 10.67 × 17.52 cm
(4.2 × 6.9 in.)
I/O connector1................................................... 68-pin, VHDCI × 2

Power requirement (from PCI channel)
PCI-8430/16
+5 VDC................................................... 935 mA typical
1.4 A maximum

Weight............................................................... 99 g
Maximum baud rate........................................ 1 Mbps

Boards support any baud rate from 2 baud up to the maximum.

**PCI-8432/2 (RS-232) and PCI-8433/2 (RS-485/422)**
Dimensions ....................................................... 10.67 × 17.52 cm
(4.2 × 6.9 in.)
I/O connector .................................................... DB-9 male connector

Operating rated voltage (continuous)
RS-232 ...................................................... -25 V to +25 V
RS-485 ...................................................... -7 V to + 12 V

Isolation voltages
Port-to-port
Continuous........................................ 60 VDC (CAT I)
Withstand................................................... 2000 V_mwp verified by a 5 s dielectric withstand test

Port-to-host
Continuous........................................ 60 VDC (CAT I)
Withstand................................................... 2000 V_mwp verified by a 5 s dielectric withstand test

---

1 The 16-port PCI serial boards require two cables, included in your kit, to convert the two 68-pin connectors to the 16 (2 × 8) DB-9 male connectors.
Power requirement (from PCI channel)

PCI-8432/2
+5 VDC ............................................. 380 mA typical
570 mA maximum

PCI-8433/2
+5 VDC ............................................. 380 mA typical
570 mA maximum

Weight
PCI-8432/2................................................ 102 g
PCI-8433/2................................................ 104 g

Maximum baud rate
PCI-8432/2................................................ 1 Mbps
PCI-8433/2................................................ 3 Mbps

Boards support any baud rate from 2 baud up to the maximum.

PCI-8432/4 (RS-232) and PCI-8433/4 (RS-485/422)
Dimensions ....................................................... 10.67 × 17.44 cm
(4.2 × 6.9 in.)

I/O connector1 ................................................... 10-position modular jack (10P10C)

Operating rated voltage (continuous)
RS-232 ...................................................... -25 V to +25 V
RS-485 ...................................................... -7 V to +12 V

Isolation voltages
Port-to-port
Continuous ............................................. 60 VDC (CAT I)
Withstand ............................................. $2000 V_{\text{rms}}$, verified by a 5 s dielectric withstand test

Port-to-host
Continuous ............................................. 60 VDC (CAT I)
Withstand ............................................. $2000 V_{\text{rms}}$, verified by a 5 s dielectric withstand test

Power requirement (from PCI channel)

PCI-8432/4
+5 VDC ............................................. 550 mA typical
815 mA maximum

PCI-8433/4
+5 VDC ............................................. 785 mA typical
1.2 A maximum

---

1 The four-port PCI serial boards require cables, included in your kit, to convert the 10-position modular (10P10C) jacks to DB-9 male connectors.
Weight
PCI-8432/4................................................ 105 g
PCI-8433/4................................................ 106 g

Maximum baud rate
PCI-8432/4................................................ 1 Mbps
PCI-8433/4................................................ 3 Mbps
Boards support any baud rate from 2 baud up to the maximum.

Environmental Characteristics (for All PCI Interfaces)

Operating Environment
Ambient temperature ........................................ 0 to 55 °C
Relative humidity ............................................. 10 to 90%, noncondensing
Altitude (maximum) ......................................... 2,000 m
Pollution Degree ............................................... 2
Indoor use only.

Storage Environment
Ambient temperature ........................................ -20 to 70 °C
Relative humidity ............................................. 5 to 95%, noncondensing

Other Specifications (for All PCI Interfaces)
Maximum cable length
RS-485..................................................... 30 m (limited by EMC/surge)
RS-232...................................................... 2,500 pF equivalent (TIA-EIA-232-F 2.1.4)

Data line ESD protection (human body model)
RS-485 ...................................................... ±15 kV
RS-232 ...................................................... ±15 kV

Note This equipment is intended for indoor use only.

---
1 RS-485 is capable of 1.2 km (4,000 ft) without surge limitation.
Safety
This product meets the requirements of the following standards of safety for electrical equipment for measurement, control, and laboratory use:

- IEC 61010-1, EN 61010-1
- UL 61010-1, CSA 61010-1

Note For UL and other safety certifications, refer to the product label or the Online Product Certification section.

Electromagnetic Compatibility
This product meets the requirements of the following EMC standards for electrical equipment for measurement, control, and laboratory use:

- EN 61326 (IEC 61326): Class A emissions; Basic immunity
- EN 55011 (CISPR 11): Group 1, Class A emissions
- AS/NZS CISPR 11: Group 1, Class A emissions
- FCC 47 CFR Part 15B: Class A emissions
- ICES-001: Class A emissions

Note For the standards applied to assess the EMC of this product, refer to the Online Product Certification section.

Note For EMC compliance, operate this device with shielded cabling.

CE Compliance
This product meets the essential requirements of applicable European Directives as follows:

- 2006/95/EC; Low-Voltage Directive (safety)
- 2004/108/EC; Electromagnetic Compatibility Directive (EMC)

Online Product Certification
Refer to the product Declaration of Conformity (DoC) for additional regulatory compliance information. To obtain product certifications and the DoC for this product, visit ni.com/certification, search by model number or product line, and click the appropriate link in the Certification column.

Environmental Management
NI is committed to designing and manufacturing products in an environmentally responsible manner. NI recognizes that eliminating certain hazardous substances from our products is beneficial to the environment and to NI customers.

For additional environmental information, refer to the Minimize Our Environmental Impact web page at ni.com/environment. This page contains the environmental regulations and directives with which NI complies, as well as other environmental information not included in this document.
Waste Electrical and Electronic Equipment (WEEE)

EU Customers  At the end of the product life cycle, all products must be sent to a WEEE recycling center. For more information about WEEE recycling centers, National Instruments WEEE initiatives, and compliance with WEEE Directive 2002/96/EC on Waste and Electronic Equipment, visit ni.com/environment/weee.

NI PCIe-843x Series Hardware

This section describes the characteristics of the PCI Express serial hardware and the recommended operating conditions.

NI PCIe-8430/8 (RS-232) and NI PCIe-8431/8 (RS-485/422)

Dimensions ....................................................... 11.12 × 17.53 cm (4.38 × 6.9 in.)

I/O connectors

NI PCIe-8430/8
- RS-2321............................................. 68-pin VHDCI
- PCI Express ...................................... x1

NI PCIe-8431/8
- RS-4851............................................. 68-pin VHDCI
- PCI Express ...................................... x1

Power requirement (from PCI Express channel)

NI PCIe-8430/8
- +3.3 VDC.......................................... 200 mA typical
  750 mA maximum
- +12 VDC.......................................... 190 mA typical
  220 mA maximum

NI PCIe-8431/8
- +3.3 VDC2 ....................................... 700 mA typical, 1.5 A maximum
- +12 VDC.......................................... 190 mA typical
  220 mA maximum

1 The 8-port PCI Express serial boards require a cable, included in your kit, to convert the 68-pin connector to eight DB-9 male connectors.

2 These values are based on the assumption that all 16 ports (for the NI PCIe-8431/16) or 8 ports (for the NI PCIe-8431/8) are using a 620 Ω bias resistor and NI-offered terminators installed on both ends of the cable.
Weight

NI PCIe-8430/8.........................................88 g
NI PCIe-8431/8.........................................90 g

Maximum baud rate

NI PCIe-8430/8.........................................1 Mbps
NI PCIe-8431/8.........................................3 Mbps

Boards support any baud rate from 2 baud up to the maximum.

**NI PCIe-8430/16 (RS-232) and NI PCIe-8431/16 (RS-485/422)**

Dimensions .......................................................11.12 × 17.53 cm (4.38 × 6.9 in.)

I/O connectors

NI PCIe-8430/16
- RS-232\(^1\) .............................................68-pin VHDCI × 2
- PCI Express...........................................×1

NI PCIe-8431/16
- RS-485\(^1\) .............................................68-pin VHDCI × 2
- PCI Express...........................................×1

Power requirement (from PCI Express channel)

NI PCIe-8430/16
- +3.3 VDC...............................................400 mA typical, 1.5 A maximum
- +12 VDC...............................................210 mA typical
  250 mA maximum

NI PCIe-8431/16
- +3.3 VDC\(^2\) ........................................1.4 A typical, 3 A maximum
- +12 VDC...............................................210 mA typical
  250 mA maximum

Weight

NI PCIe-8430/16.........................................99 g
NI PCIe-8431/16.........................................101 g

Maximum baud rate

NI PCIe-8430/16.........................................1 Mbps
NI PCIe-8431/16.........................................3 Mbps

Boards support any baud from 2 baud up to the maximum.

---

\(^1\) The 16-port PCI Express serial boards require two cables, included in your kit, to convert the two 68-pin connectors to the 16 (2 × 8) DB-9 male connectors.

\(^2\) These values are based on the assumption that all 16 ports (for the NI PCIe-8431/16) or 8 ports (for the NI PCIe-8431/8) are using a 620 Ω bias resistor and NI-offered terminators installed on both ends of the cable.
NI PCIe-8432/2 (RS-232) and NI PCIe-8433/2 (RS-485/422)

Dimensions ................................................................. 11.12 × 16.67 cm (4.38 × 6.6 in.)

I/O connectors
- NI PCIe-8432/2 ................................................. DB-9 male connector
- NI PCIe-8433/2 ................................................. DB-9 male connector

Operating rated voltage (continuous)
- RS-232 ..................................................... -25 V to +25 V
- RS-485 ...................................................... -7 V to +12 V

Isolation voltages
- Port-to-port
  - Continuous ........................................ 60 VDC (CAT I)
  - Withstand ........................................ 2000 Vrms verified by a 5 s dielectric withstand test
- Port-to-host
  - Continuous ........................................ 60 VDC (CAT I)
  - Withstand ........................................ 2000 Vrms verified by a 5 s dielectric withstand test

Power requirement (from PCI Express channel)
- NI PCIe-8432/2
  - +12 VDC ........................................... 55 mA typical
  - ........................................... 160 mA maximum
  - +3.3 VDC .......................................... 610 mA typical
  - .......................................... 650 mA maximum
- NI PCIe-8433/2
  - +12 VDC ........................................... 140 mA typical
  - ........................................... 240 mA maximum
  - +3.3 VDC .......................................... 610 mA typical
  - .......................................... 660 mA maximum

Weight
- NI PCIe-8432/2 ................................................. 90.7 g
- NI PCIe-8433/2 ................................................. 90.7 g

Maximum serial transfer rate
- RS-232 ..................................................... 1 Mbps
- RS-485 ..................................................... 3 Mbps
Environmental Characteristics (for All PCI Express Interfaces)

Operating Environment
Ambient temperature ........................................0 to 55 °C
Relative humidity ..............................................10 to 90%, noncondensing
Altitude (maximum) .........................................2,000 m
Indoor use only.

Storage Environment
Ambient temperature .......................................-20 to 70 °C
Relative humidity ..............................................5 to 95%, noncondensing

Other Specifications (for All PCI Express Interfaces)
Maximum cable length
RS-485 .....................................................30 m (limited by EMC/surge)
RS-232 ......................................................2,500 pF equivalent (TIA-EIA-232-F 2.1.4)

Data line ESD protection (human body model)
RS-485 ......................................................±15 kV
RS-232 ......................................................±15 kV

Baud rate accuracy
RS-232 ......................................................Within 0.015% for standard baud rate
Within 0.5% for nonstandard baud rate
RS-485 ......................................................Within 0.015% for standard baud rate
Within 0.5% for nonstandard baud rate below
1 Mbps
Within 1.3% for nonstandard baud rate between
1 Mbps and 3 Mbps

Note  This equipment is intended for indoor use only.

1 RS-485 is capable of 1.2 km (4,000 ft) without surge limitation.
Safety
This product meets the requirements of the following standards of safety for electrical equipment for measurement, control, and laboratory use:
• IEC 61010-1, EN 61010-1
• UL 61010-1, CSA 61010-1

Note For UL and other safety certifications, refer to the product label or the Online Product Certification section.

Electromagnetic Compatibility
This product meets the requirements of the following EMC standards for electrical equipment for measurement, control, and laboratory use:
• EN 61326 (IEC 61326): Class A emissions; Basic immunity
• EN 55011 (CISPR 11): Group 1, Class A emissions
• AS/NZS CISPR 11: Group 1, Class A emissions
• FCC 47 CFR Part 15B: Class A emissions
• ICES-001: Class A emissions

Note For the standards applied to assess the EMC of this product, refer to the Online Product Certification section.

Note For EMC compliance, operate this device with shielded cabling.

CE Compliance
This product meets the essential requirements of applicable European Directives as follows:
• 2006/95/EC; Low-Voltage Directive (safety)
• 2004/108/EC; Electromagnetic Compatibility Directive (EMC)

Online Product Certification
Refer to the product Declaration of Conformity (DoC) for additional regulatory compliance information. To obtain product certifications and the DoC for this product, visit ni.com/certification, search by model number or product line, and click the appropriate link in the Certification column.

Environmental Management
NI is committed to designing and manufacturing products in an environmentally responsible manner. NI recognizes that eliminating certain hazardous substances from our products is beneficial to the environment and to NI customers.

For additional environmental information, refer to the Minimize Our Environmental Impact web page at ni.com/environment. This page contains the environmental regulations and directives with which NI complies, as well as other environmental information not included in this document.
Waste Electrical and Electronic Equipment (WEEE)

**EU Customers** At the end of the product life cycle, all products must be sent to a WEEE recycling center. For more information about WEEE recycling centers, National Instruments WEEE initiatives, and compliance with WEEE Directive 2002/96/EC on Waste and Electronic Equipment, visit ni.com/environment/weee.

**PXI Serial Hardware**

This section describes the characteristics of the PXI serial hardware and the recommended operating conditions.

**PXI-843x Serial Hardware**

**PXI-8430/2 (RS-232) and PXI-8431/2 (RS-485/422)**

- **Dimensions** .......................................................100 × 160 mm (3.94 × 6.37 in.)
- **I/O connector** ....................................................DB-9 male connector
- **Power requirement (from PXI channel)**
  - PXI-8430/2
    - +5 VDC ..................................................325 mA typical
    - 500 mA maximum
  - PXI-8431/2
    - +5 VDC ..................................................500 mA typical
    - 750 mA maximum

- **Weight**
  - PXI-8430/2................................................134 g
  - PXI-8431/2................................................134 g

- **Maximum baud rate**
  - PXI-8430/2................................................1 Mbps
  - PXI-8431/2................................................3 Mbps

Boards support any baud rate from 2 baud up to the maximum.
**PXI-8430/4 (RS-232) and PXI-8431/4 (RS-485/422)**

Dimensions ....................................................... 100 × 160 mm
(3.94 × 6.37 in.)

I/O connector¹ ................................................... 10-position modular jack (10P10C)

Power requirement (from PXI channel)

PXI-8430/4
+5 VDC............................................. 400 mA typical
600 mA maximum

PXI-8431/4
+5 VDC............................................. 725 mA typical
1.1 A maximum

Weight
PXI-8430/4 ............................................... 137 g
PXI-8431/4 ............................................... 140 g

Maximum baud rate
PXI-8430/4 ............................................... 1 Mbps
PXI-8431/4 ............................................... 3 Mbps

Boards support any baud rate from 2 baud up to the maximum.

**PXI-8430/8 (RS-232) and PXI-8431/8 (RS-485/422)**

Dimensions ....................................................... 100 × 160 mm
(3.94 × 6.37 in.), 3U

I/O connector² ................................................... 68-pin SCSI (68-pin SCSI to eight DB-9 male connector adapter cable included)

Power requirement (from PXI channel)

PXI-8430/8
+5 VDC............................................. 1 A typical
1.5 A maximum

PXI-8431/8
+5 VDC............................................. 925 mA typical
1.4 A maximum

Weight
PXI-8430/8 ............................................... 135 g
PXI-8431/8 ............................................... 137 g

¹ The four-port PXI serial boards require cables, included in your kit, to convert the 10-position modular jacks (10P10C) to DB-9 male connectors.

² The eight-port PXI serial boards require a cable, included in your kit, to convert the 68-pin connector to eight DB-9 connectors.
Shock and vibration
Operational shock .....................................30 g peak, half-sine, 11 ms pulse
(Tested in accordance with IEC-60068-2-27.
Test profile developed in accordance with
MIL-PRF-28800F.)

Maximum baud rate
PXI-8430/8................................................1 Mbps
PXI-8431/8................................................3 Mbps
Boards support any baud rate from 2 baud up to the maximum.

**PXI-8430/16 (RS-232)**
Dimensions .......................................................100 × 160 mm
(3.94 × 6.37 in.), 3U
I/O connector1...................................................68-pin VHDCI × 2
Power requirement (from PXI channel)
PXI-8430/16
+5 VDC.............................................935 mA typical
1.4 A maximum
Weight ...............................................................157 g
Maximum baud rate ........................................1 Mbps
Boards support any baud rate from 2 baud up to the maximum.

**PXI-8432/2 (RS-232) and PXI-8433/2 (RS-485/422)**
Dimensions .......................................................100 × 160 mm
(3.94 × 6.37 in.), 3U
I/O connector ....................................................DB-9 male connector × 2
Operating rated voltage (continuous)
RS-232 ......................................................-25 V to +25 V
RS-485 ......................................................-7 V to + 12 V
Isolation voltages
Port-to-port
Continuous .................................................60 VDC (CAT I)
Withstand .....................................................2000 Vrms verified by a 5 s dielectric
withstand test

1 The 16-port PXI serial boards require two cables, included in your kit, to convert the two 68-pin connectors
to the 16 (2 × 8) DB-9 male connectors.
Port-to-host
  Continuous ........................................... 60 VDC (CAT I)
  Withstand ........................................... 2000 Vrms, verified by a 5 s dielectric withstand test

Power requirement (from PXI channel)
  PXI-8432/2
    +5 VDC ........................................... 725 mA typical
    1 A maximum
  PXI-8433/2
    +5 VDC ........................................... 725 mA typical
    1 A maximum

Weight
  PXI-8432/2 ........................................... 125 g
  PXI-8433/2 ........................................... 125 g

Shock and vibration
  Operational shock .................................... 30 g peak, half-sine, 11 ms pulse
  (Tested in accordance with IEC-60068-2-27. Test profile developed in accordance with MIL-PRF-28800F.)

Random vibration
  Operating ............................................ 5 to 500 Hz, 0.3 g<sub>rms</sub>
  Nonoperating ........................................ 5 to 500 Hz, 2.4 g<sub>rms</sub>
  (Tested in accordance with IEC-60068-2-64. Nonoperating test profile exceeds the requirements of MIL-PRF-28800F, Class 3.)

Maximum baud rate
  PXI-8432/2 ........................................... 1 Mbps
  PXI-8433/2 ........................................... 3 Mbps

Boards support any baud rate from 2 baud up to the maximum.

**PXI-8432/4 (RS-232) and PXI-8433/4 (RS-485/422)**

Dimensions ........................................... 100 × 160 mm
  (3.94 × 6.37 in.), 3U

I/O connector<sup>1</sup> ...................................... 10-position modular jack (10P10C)

Operating rated voltage (continuous)
  RS-232 .............................................. -25 V to +25 V
  RS-485 .............................................. -7 V to +12 V

---

<sup>1</sup> The four-port PXI serial boards require cables, included in your kit, to convert the 10-position modular jacks (10P10C) to DB-9 male connectors.
Isolation voltages

Port-to-port
- Continuous ........................................60 VDC (CAT I)
- Withstand ..........................................2000 Vrms, verified by a 5 s dielectric withstand test

Port-to-host
- Continuous ........................................60 VDC (CAT I)
- Withstand ..........................................2000 Vrms, verified by a 5 s dielectric withstand test

Power requirement (from PXI channel)

- PXI-8432/4
  - +5 VDC .............................................925 mA typical
  - 2 A maximum

- PXI-8433/4
  - +5 VDC .............................................950 mA typical
  - 2 A maximum

Weight

- PXI-8432/4 ................................................147 g
- PXI-8433/4 ................................................147 g

Maximum baud rate

- PXI-8432/4 ................................................1 Mbps
- PXI-8433/4 ................................................3 Mbps

Boards support any baud rate from 2 baud up to the maximum.

Environmental Characteristics (for All PXI Interfaces)

Operating Environment

Ambient temperature ........................................0 to 55 °C
(Tested in accordance with IEC-60068-2-1 and IEC-60068-2-2.)

Relative humidity ..............................................10 to 90%, noncondensing
(Tested in accordance with IEC-60068-2-56.)

Altitude (maximum) .........................................2,000 m

Pollution Degree ...............................................2

Indoor use only.
Storage Environment

Ambient temperature ........................................ -20 to 70 °C
( Tested in accordance with IEC-60068-2-1 and IEC-60068-2-2.)

Relative humidity ............................................. 5 to 95%, noncondensing
( Tested in accordance with IEC-60068-2-56.)

Other Specifications (for All PXI Interfaces)

Maximum cable length

- RS-485 ..................................................... 30 m (limited by EMC/surge)
- RS-232 ...................................................... 2,500 pF equivalent (TIA-EIA-232-F 2.1.4)

Data line ESD protection (human body model)

- RS-485 ..................................................... ±15 kV
- RS-232 ...................................................... ±15 kV

Note This equipment is intended for indoor use only.

Safety

This product meets the requirements of the following standards of safety for electrical equipment for measurement, control, and laboratory use:

- IEC 61010-1, EN 61010-1
- UL 61010-1, CSA 61010-1

Note For UL and other safety certifications, refer to the product label or the Online Product Certification section.

Electromagnetic Compatibility

This product meets the requirements of the following EMC standards for electrical equipment for measurement, control, and laboratory use:

- EN 61326 (IEC 61326): Class A emissions; Basic immunity
- EN 55011 (CISPR 11): Group 1, Class A emissions
- AS/NZS CISPR 11: Group 1, Class A emissions
- FCC 47 CFR Part 15B: Class A emissions
- ICES-001: Class A emissions

Note For the standards applied to assess the EMC of this product, refer to the Online Product Certification section.

Note For EMC compliance, operate this device with shielded cabling.

1 RS-485 is capable of 1.2 km (4,000 ft) without surge limitation.
CE Compliance

This product meets the essential requirements of applicable European Directives as follows:

- 2006/95/EC; Low-Voltage Directive (safety)
- 2004/108/EC; Electromagnetic Compatibility Directive (EMC)

Online Product Certification

Refer to the product Declaration of Conformity (DoC) for additional regulatory compliance information. To obtain product certifications and the DoC for this product, visit ni.com/certification, search by model number or product line, and click the appropriate link in the Certification column.

Environmental Management

NI is committed to designing and manufacturing products in an environmentally responsible manner. NI recognizes that eliminating certain hazardous substances from our products is beneficial to the environment and to NI customers.

For additional environmental information, refer to the Minimize Our Environmental Impact web page at ni.com/environment. This page contains the environmental regulations and directives with which NI complies, as well as other environmental information not included in this document.

Waste Electrical and Electronic Equipment (WEEE)

EU Customers

At the end of the product life cycle, all products must be sent to a WEEE recycling center. For more information about WEEE recycling centers, National Instruments WEEE initiatives, and compliance with WEEE Directive 2002/96/EC on Waste and Electronic Equipment, visit ni.com/environment/weee.

电子信息产品污染控制管理办法（中国 RoHS）

1 M and 3 M

---

1 The 16-port PXI Express serial boards require two cables, included in your kit, to convert the two 68-pin connectors to the 16 (2 × 8) DB-9 male connectors.

2 These values are based on the assumption that all 16 ports (for the NI PXIe-8431/16) or 8 ports (for the NI PXIe-8431/8) are using a 620 Ω bias resistor and NI-offered terminators installed on both ends of the cable.

3 For possible use with higher baud rates, refer to ni.com/kb and search for KnowledgeBase KB58KEI82F.
Environmental Characteristics
(for All PXI Express Interfaces)

Operating Environment

Ambient temperature ........................................ 0 to 55 °C
(Tested in accordance with IEC-60068-2-1 and IEC-60068-2-2. Meets MIL-PRF-28800F Class 3 low temperature limit and MIL-PRF-28800F Class 2 high temperature limit.)

Relative humidity ............................................. 10 to 90%, noncondensing
(Tested in accordance with IEC-60068-2-56.)

Altitude (maximum) ......................................... 2,000 m

Pollution degree ............................................. 2

Indoor use only.

Storage Environment

Ambient temperature ........................................ -40 to 71 °C
(Tested in accordance with IEC-60068-2-1 and IEC-60068-2-2. Meets MIL-PRF-28800F Class 3 limits.)

Relative humidity ............................................. 5 to 95%, noncondensing
(Tested in accordance with IEC-60068-2-56.)

Other Specifications (for All PXI Express Interfaces)

Maximum cable length
- RS-485 ..................................................... 30 m (limited by EMC/surge)
- RS-232 ..................................................... 2,500 pF equivalent (TIA-EIA-232-F 2.1.4)

Data line ESD protection (human body model)
- RS-485 ..................................................... ±15 kV
- RS-232 ..................................................... ±15 kV

Shock and vibration
- Operational shock ........................................ 30 g peak, half-sine, 11 ms pulse
  (Tested in accordance with IEC-60068-2-27. Meets MIL-PRF-28800F Class 2 limits.)

1 RS-485 is capable of 1.2 km (4,000 ft) without surge limitation.
Random vibration

Operating ..........................................5 to 500 Hz, 0.3 g$_{rms}$
Nonoperating ....................................5 to 500 Hz, 2.4 g$_{rms}$

(Tested in accordance with IEC-60068-2-64. Nonoperating test profile exceeds the requirements of MIL-PRF-28800F, Class 3.)

Note  This equipment is intended for indoor use only.

Safety

This product meets the requirements of the following standards of safety for electrical equipment for measurement, control, and laboratory use:

• IEC 61010-1, EN 61010-1
• UL 61010-1, CSA 61010-1

Note  For UL and other safety certifications, refer to the product label or the Online Product Certification section.

Electromagnetic Compatibility

This product meets the requirements of the following EMC standards for electrical equipment for measurement, control, and laboratory use:

• EN 61326 (IEC 61326): Class A emissions; Basic immunity
• EN 55011 (CISPR 11): Group 1, Class A emissions
• AS/NZS CISPR 11: Group 1, Class A emissions
• FCC 47 CFR Part 15B: Class A emissions
• ICES-001: Class A emissions

Note  For the standards applied to assess the EMC of this product, refer to the Online Product Certification section.

Note  For EMC compliance, operate this device with shielded cabling.

CE Compliance

This product meets the essential requirements of applicable European Directives as follows:

• 2006/95/EC; Low-Voltage Directive (safety)
• 2004/108/EC; Electromagnetic Compatibility Directive (EMC)
Online Product Certification

Refer to the product Declaration of Conformity (DoC) for additional regulatory compliance information. To obtain product certifications and the DoC for this product, visit ni.com/certification, search by model number or product line, and click the appropriate link in the Certification column.

Environmental Management

NI is committed to designing and manufacturing products in an environmentally responsible manner. NI recognizes that eliminating certain hazardous substances from our products is beneficial to the environment and to NI customers.

For additional environmental information, refer to the Minimize Our Environmental Impact web page at ni.com/environment. This page contains the environmental regulations and directives with which NI complies, as well as other environmental information not included in this document.

Waste Electrical and Electronic Equipment (WEEE)

EU Customers  At the end of the product life cycle, all products must be sent to a WEEE recycling center. For more information about WEEE recycling centers, National Instruments WEEE initiatives, and compliance with WEEE Directive 2002/96/EC on Waste and Electronic Equipment, visit ni.com/environment/weee.

USB Serial Hardware

This section describes the characteristics of the USB serial hardware and the recommended operating conditions.

USB-232 (RS-232) and USB-485 (RS-485/422)

Dimensions ....................................................... 3.81 × 3.56 × 1.52 cm
(1.5 × 1.4 × 0.6 in.)

Case material .................................................... PVC

Weight

USB-232 ................................................... 121 g (0.27 lb)
USB-485 ................................................... 118 g (0.26 lb)

I/O connector .................................................... DB-9 male connector

USB connector.................................................. Captive cable with USB series A plug
Power requirement (from USB channel)

USB-485
+5 VDC .................................................. 175 mA typical

500 mA maximum

USB-232
+5 VDC .................................................. 80 mA typical

100 mA maximum

Maximum baud rate
USB-232 ................................................... 230.4 kbps
USB-485 ................................................... 460.8 kbps

Boards support standard baud rates below the maximum.

Dimensions ................................................... 21.08 × 12.45 × 3.56 cm

(8.3 × 4.9 × 1.4 in.)

Case material ............................................... Hard plastic with metal baseplate

Weight ........................................................... 375 g (0.83 lb)

I/O connector ............................................... DB-9 male connector

USB connector ........................................... USB series B

Power requirement (from USB channel)

USB-485/2
+5 VDC .................................................. 300 mA typical

500 mA maximum

USB-232/2
+5 VDC .................................................. 200 mA typical

500 mA maximum

USB-232/4
+5 VDC .................................................. 300 mA typical

500 mA maximum

Power requirement (from external supply)

USB-485/4 (9 V-30 V)
+12 VDC (typical) ...................................... 225 mA typical

500 mA maximum

Maximum baud rate
USB-232/2 and USB-232/4 ................................ 230.4 kbps
USB-485/2 and USB-485/4 ................................ 460.8 kbps

Boards support standard baud rates below the maximum.
Environmental Characteristics (for All USB Interfaces)

Operating Environment

Ambient temperature ........................................ 0 to 70 °C
(Tested in accordance with IEC-60068-2-1 and IEC-60068-2-2.)

Relative humidity ............................................. 10 to 90%, noncondensing
(Tested in accordance with IEC-60068-2-56.)

Altitude (maximum) ......................................... 2,000 m

Pollution Degree ............................................... 2

Indoor use only.

Storage Environment

Ambient temperature

One port .................................................... -40 to 80 °C
(Tested in accordance with IEC-60068-2-1 and IEC-60068-2-2.)

Two and four port ..................................... -40 to 85 °C
(Tested in accordance with IEC-60068-2-1 and IEC-60068-2-2.)

Relative humidity ............................................. 5 to 95%, noncondensing
(Tested in accordance with IEC-60068-2-56.)

Other Specifications (for All USB Interfaces)

Maximum cable length

RS-4851 ..................................................... 30 m (limited by EMC/surge)
RS-232 ...................................................... 2,500 pF equivalent (TIA-EIA-232-F 2.1.4)

Data line ESD protection (human body model)

RS-485 ...................................................... ±15 kV
RS-232 ...................................................... ±15 kV

Note  This equipment is intended for indoor use only.

Safety

This product meets the requirements of the following standards of safety for electrical equipment for measurement, control, and laboratory use:

• IEC 61010-1, EN 61010-1
• UL 61010-1, CSA 61010-1

1 RS-485 is capable of 1.2 km (4,000 ft) without surge limitation.
Note  For UL and other safety certifications, refer to the product label or the Online Product Certification section.

Electromagnetic Compatibility
This product meets the requirements of the following EMC standards for electrical equipment for measurement, control, and laboratory use:
• EN 61326 (IEC 61326): Class A emissions; Basic immunity
• EN 55011 (CISPR 11): Group 1, Class A emissions
• AS/NZS CISPR 11: Group 1, Class A emissions
• FCC 47 CFR Part 15B: Class A emissions
• ICES-001: Class A emissions

Note  For the standards applied to assess the EMC of this product, refer to the Online Product Certification section.

Note  For EMC compliance, operate this device with shielded cabling.

CE Compliance
This product meets the essential requirements of applicable European Directives as follows:
• 2006/95/EC; Low-Voltage Directive (safety)
• 2004/108/EC; Electromagnetic Compatibility Directive (EMC)

Online Product Certification
Refer to the product Declaration of Conformity (DoC) for additional regulatory compliance information. To obtain product certifications and the DoC for this product, visit ni.com/certification, search by model number or product line, and click the appropriate link in the Certification column.

Environmental Management
NI is committed to designing and manufacturing products in an environmentally responsible manner. NI recognizes that eliminating certain hazardous substances from our products is beneficial to the environment and to NI customers.

For additional environmental information, refer to the Minimize Our Environmental Impact web page at ni.com/environment. This page contains the environmental regulations and directives with which NI complies, as well as other environmental information not included in this document.
### Waste Electrical and Electronic Equipment (WEEE)

**EU Customers** At the end of the product life cycle, all products must be sent to a WEEE recycling center. For more information about WEEE recycling centers, National Instruments WEEE initiatives, and compliance with WEEE Directive 2002/96/EC on Waste and Electronic Equipment, visit ni.com/environment/weee.

### ENET Serial Hardware

This section describes the characteristics of the ENET serial hardware, along with the recommended operating conditions.

#### Electrical Characteristics

Power requirement (from external supply)
- External supply (9 V-30 V)
  - +12 VDC (typical)............................ 500 mA typical
  - 750 mA maximum

#### Environmental Characteristics

**Operating Environment**
- Ambient temperature ........................................ 0 to 70 °C
  (Tested in accordance with IEC-60068-2-1 and IEC-60068-2-2.)
- Relative humidity ............................................. 10 to 90%, noncondensing
  (Tested in accordance with IEC-60068-2-56.)
- Altitude (maximum) ......................................... 2,000 m

**Storage Environment**
- Ambient temperature ........................................ -40 to 85 °C
  (Tested in accordance with IEC-60068-2-1 and IEC-60068-2-2.)
- Relative humidity ............................................. 5 to 95%, noncondensing
  (Tested in accordance with IEC-60068-2-56.)
Physical Characteristics

Overall case size (dimensions) .........................21.0 × 12.4 × 3.7 cm
(8.25 × 4.89 × 1.44 in.)
Case material.....................................................Hard plastic with metal baseplate
Weight...............................................................394 g (0.87 lb)
Serial connectors...............................................DB-9 male connector

Network Specifications
Ethernet connector ............................................RJ-45
Connection type ................................................IEEE 802.3 compliant
100Base-TX (100 Mbits/s)
10Base-T (10 Mbits/s)
Duplex mode.....................................................Half duplex

Maximum cable length
- RS-485\(^1\) .................................................30 m (limited by EMC/surge)
- RS-232 ..................................................2,500 pF equivalent (TIA-EIA-232-F 2.1.4)

Data line ESD protection (human body model)
- RS-485 ......................................................±15 kV
- RS-232 ......................................................±15 kV

Maximum baud rate
- ENET-232/2 and ENET-232/4 ..................230.4 kbps
- ENET-485/2 and ENET-485/4 .................460.8 kbps

Boards support standard baud rates below the maximum.

Note This equipment is intended for indoor use only.

Safety

This product meets the requirements of the following standards of safety for electrical equipment for measurement, control, and laboratory use:
- IEC 60950-1, EN 60950-1
- UL 60950-1, CSA 60950-1

\(^1\) RS-485 is capable of 1.2 km (4,000 ft) without surge limitation.
Electromagnetic Compatibility

This product meets the requirements of the following EMC standards for electrical equipment for measurement, control, and laboratory use:

- EN 61326 (IEC 61326): Class A emissions; Basic immunity
- EN 55011 (CISPR 11): Group 1, Class A emissions
- AS/NZS CISPR 11: Group 1, Class A emissions
- FCC 47 CFR Part 15B: Class A emissions
- ICES-001: Class A emissions

For the standards applied to assess the EMC of this product, refer to the Online Product Certification section.

For EMC compliance, operate this device with shielded cabling.

CE Compliance

This product meets the essential requirements of applicable European Directives as follows:

- 2006/95/EC; Low-Voltage Directive (safety)
- 2004/108/EC; Electromagnetic Compatibility Directive (EMC)

Online Product Certification

Refer to the product Declaration of Conformity (DoC) for additional regulatory compliance information. To obtain product certifications and the DoC for this product, visit ni.com/certification, search by model number or product line, and click the appropriate link in the Certification column.

Environmental Management

NI is committed to designing and manufacturing products in an environmentally responsible manner. NI recognizes that eliminating certain hazardous substances from our products is beneficial to the environment and to NI customers.

For additional environmental information, refer to the Minimize Our Environmental Impact web page at ni.com/environment. This page contains the environmental regulations and directives with which NI complies, as well as other environmental information not included in this document.
Waste Electrical and Electronic Equipment (WEEE)

**EU Customers** At the end of the product life cycle, all products must be sent to a WEEE recycling center. For more information about WEEE recycling centers, National Instruments WEEE initiatives, and compliance with WEEE Directive 2002/96/EC on Waste and Electronic Equipment, visit ni.com/environment/weee.

电子信息产品污染控制管理办法（中国 RoHS）

**中国客户** National Instruments 符合中国电子信息产品中限制使用某些有害物质指令 (RoHS)。关于 National Instruments 中国 RoHS 合规性信息，请登录 ni.com/environment/rohs_china。 (For information about China RoHS compliance, go to ni.com/environment/rohs_china.)

ExpressCard Serial Hardware

This section describes the characteristics of the ExpressCard serial hardware, along with the recommended operating conditions.

**Hardware Specifications (NI ExpressCard-8420/2 (RS-232) and NI ExpressCard-8421/2 (RS-485/422))**

**Dimensions** .......................................................34 × 75 × 5 mm  
(1.34 × 2.95 × 0.2 in.)

**Weight**
- NI ExpressCard-8420/2 ............................16 g (0.5 oz)
- NI ExpressCard-8421/2 ............................17 g (0.6 oz)

**Connectors**
- I/O connector ............................................26-position latching connector with 20 cm breakout cable to two DB-9 male connectors
- ExpressCard ..............................................ExpressCard/34 standard connector interface

**Power requirements**  
(from ExpressCard USB interface)
- Voltage ......................................................+3.3 VDC ± 10%
  - NI ExpressCard-8420/2
    - +3.3 VDC ..........................................100 mA typical  
    - 250 mA maximum
  - NI ExpressCard-8421/2
    - +3.3 VDC ..........................................160 mA typical  
    - 260 mA maximum

**Shock and Vibration**
- Nonoperating shock ........................................50 g, 11 ms  
  (Tested in accordance with IEC-60068-2-27.)
Nonoperating vibration,
sinusoidal .............................................. 15 g, 100 to 2000 Hz  
( Tested in accordance with IEC-60068-2-6.)
Nonoperating drop test .............................. 2 drops in 3 mutually exclusive axes from 75 cm  
on onto no-cushioning vinyl tile surface

Environmental Characteristics
Altitude (maximum) ..................................... 2,000 m (at 25 °C ambient temperature)
Pollution Degree .......................................... 2
Indoor use only.

Operating Environment
Ambient temperature ..................................... 0 to 65 °C  
( Tested in accordance with IEC-60068-2-1 and  
IEC-60068-2-2.)
Relative humidity ...................................... 5 to 95%, noncondensing  
( Tested in accordance with IEC-60068-2-56.)

⚠️ Hot Surface  Be careful when removing ExpressCards. Recently used  
ExpressCards may exceed safe handling temperatures.

Storage Environment
Ambient temperature ..................................... -20 to 65 °C  
( Tested in accordance with IEC-60068-2-1 and  
IEC-60068-2-2.)
Nonoperating thermal shock ......................... -20 to 65 °C, 5 shocks

Other Specifications
Maximum cable length
RS-485 ...................................................... 30 m (limited by EMC/surge)
RS-232 ...................................................... 2,500 pF equivalent (TIA-EIA-232-F 2.1.4)

Data line ESD protection (human body model)
RS-485 ...................................................... ±15 kV
RS-232 ...................................................... ±15 kV

Maximum baud rate
NI ExpressCard-8420/2 .............................. 230.4 kbps
NI ExpressCard-8421/2 .............................. 460.8 kbps
Boards support standard baud rates below the maximum.

---

1 RS-485 is capable of 1.2 km (4,000 ft) without surge limitation.
Note This equipment is intended for indoor use only.

Safety
This product meets the requirements of the following standards of safety for electrical equipment for measurement, control, and laboratory use:
- IEC 61010-1, EN 61010-1
- UL 61010-1, CSA 61010-1

Note For UL and other safety certifications, refer to the product label or the Online Product Certification section.

Electromagnetic Compatibility
This product meets the requirements of the following EMC standards for electrical equipment for measurement, control, and laboratory use:
- EN 61326 (IEC 61326): Class A emissions; Basic immunity
- EN 55011 (CISPR 11): Group 1, Class A emissions
- AS/NZS CISPR 11: Group 1, Class A emissions
- FCC 47 CFR Part 15B: Class A emissions
- ICES-001: Class A emissions

Note For the standards applied to assess the EMC of this product, refer to the Online Product Certification section.

Note For EMC compliance, operate this device with shielded cabling.

CE Compliance
This product meets the essential requirements of applicable European Directives as follows:
- 2006/95/EC; Low-Voltage Directive (safety)
- 2004/108/EC; Electromagnetic Compatibility Directive (EMC)

Online Product Certification
Refer to the product Declaration of Conformity (DoC) for additional regulatory compliance information. To obtain product certifications and the DoC for this product, visit ni.com/certification, search by model number or product line, and click the appropriate link in the Certification column.

Environmental Management
NI is committed to designing and manufacturing products in an environmentally responsible manner. NI recognizes that eliminating certain hazardous substances from our products is beneficial to the environment and to NI customers.
For additional environmental information, refer to the Minimize Our Environmental Impact web page at ni.com/environment. This page contains the environmental regulations and directives with which NI complies, as well as other environmental information not included in this document.

Waste Electrical and Electronic Equipment (WEEE)

EU Customers At the end of the product life cycle, all products must be sent to a WEEE recycling center. For more information about WEEE recycling centers, National Instruments WEEE initiatives, and compliance with WEEE Directive 2002/96/EC on Waste and Electronic Equipment, visit ni.com/environment/weee.

PCMCIA Serial Hardware

This section describes the characteristics of the PCMCIA serial hardware, along with the recommended operating conditions.

Dimensions ....................................................... Type II PC card
I/O connector .................................................... Adapter cable with DB-9 male Dsub connector and converter for PC card

Power requirement (from PCMCIA expansion slot)

PCMCIA-232
+5 VDC............................................. 40 mA typical
                                           150 mA maximum

PCMCIA-485
+5 VDC............................................. 110 mA typical
                                           225 mA maximum

PCMCIA-232/2
+5 VDC............................................. 60 mA typical
                                           250 mA maximum
PCMCIA-485/2
+5 VDC................................. 150 mA typical
400 mA maximum

PCMCIA-232/4
+5 VDC................................. 60 mA typical
200 mA maximum

Environmental Characteristics

Operating Environment
Ambient temperature ........................................0 to 55 °C
(Tested in accordance with IEC-60068-2-1 and IEC-60068-2-2.)
Relative humidity ........................................... 10 to 90%, noncondensing
(Tested in accordance with IEC-60068-2-56.)
Altitude (maximum) ........................................ 2,000 m

Storage Environment
Ambient temperature ........................................ -40 to 120 °C
(Tested in accordance with IEC-60068-2-1 and IEC-60068-2-2.)
Relative humidity ........................................... 5 to 95%, noncondensing
(Tested in accordance with IEC-60068-2-56.)

Other Specifications
Maximum cable length
RS-485..................................................... 30 m (limited by EMC/surge)
RS-232 ...................................................... 2,500 pF equivalent (TIA-EIA-232-F 2.1.4)

Data line ESD protection (human body model)
RS-485 ...................................................... ±15 kV
RS-232 ...................................................... ±15 kV

Maximum baud rate
PCMCIA-232 and
PCMCIA-232/2........................................... 230.4 kbps
PCMCIA-232/4........................................... 115.2 kbps
PCMCIA-485 and
PCMCIA-485/2........................................... 921.6 kbps

Boards support standard baud rates below the maximum.

1 RS-485 is capable of 1.2 km (4,000 ft) without surge limitation.
Note  This equipment is intended for indoor use only.

Safety
This product meets the requirements of the following standards of safety for electrical equipment for measurement, control, and laboratory use:

• IEC 60950-1, EN 60950-1
• UL 60950-1, CSA 60950-1

Note  For UL and other safety certifications, refer to the product label or the Online Product Certification section.

Electromagnetic Compatibility
This product meets the requirements of the following EMC standards for electrical equipment for measurement, control, and laboratory use:

• EN 61326 (IEC 61326): Class A emissions; Basic immunity
• EN 55011 (CISPR 11): Group 1, Class A emissions
• AS/NZS CISPR 11: Group 1, Class A emissions
• FCC 47 CFR Part 15B: Class A emissions
• ICES-001: Class A emissions

Note  For the standards applied to assess the EMC of this product, refer to the Online Product Certification section.

Note  For EMC compliance, operate this device with shielded cabling.

CE Compliance
This product meets the essential requirements of applicable European Directives as follows:

• 2006/95/EC; Low-Voltage Directive (safety)
• 2004/108/EC; Electromagnetic Compatibility Directive (EMC)

Online Product Certification
Refer to the product Declaration of Conformity (DoC) for additional regulatory compliance information. To obtain product certifications and the DoC for this product, visit ni.com/certification, search by model number or product line, and click the appropriate link in the Certification column.

Where to Go for Support

The National Instruments Web site is your complete resource for technical support. At ni.com/support you have access to everything from troubleshooting and application development self-help resources to email and phone assistance from NI Application Engineers.

A Declaration of Conformity (DoC) is our claim of compliance with the Council of the European Communities using the manufacturer’s declaration of conformity. This system affords the user protection for electromagnetic compatibility (EMC) and product safety. You can obtain the DoC for your product by visiting ni.com/certification. If your product supports calibration, you can obtain the calibration certificate for your product at ni.com/calibration.

National Instruments corporate headquarters is located at 11500 North Mopac Expressway, Austin, Texas, 78759-3504. National Instruments also has offices located around the world to help address your support needs. For telephone support in the United States, create your service request at ni.com/support and follow the calling instructions or dial 512 795 8248. For telephone support outside the United States, visit the Worldwide Offices section of ni.com/niglobal to access the branch office Web sites, which provide up-to-date contact information, support phone numbers, email addresses, and current events.

Refer to the NI Trademarks and Logo Guidelines at ni.com/trademarks for more information on National Instruments trademarks. Other product and company names mentioned herein are trademarks or trade names of their respective companies. For patents covering National Instruments products/technology, refer to the appropriate location: Help->Patents in your software, the patents.txt file on your media, or the National Instruments Patents Notice at ni.com/patents. You can find information about end-user license agreements (EULAs) and third-party legal notices in the readme file for your NI product. Refer to the Export Compliance Information at ni.com/legal/export-compliance for the National Instruments global trade compliance policy and how to obtain relevant HTS codes, ECCNs, and other import/export data.
