Definitions

⚠️ **Caution** The protection provided by the USB-5133 can be impaired if it is used in a manner not described in this document.

*Warranted* specifications describe the performance of a model under stated operating conditions and are covered by the model warranty. *Warranted* specifications account for measurement uncertainties, temperature drift, and aging. *Warranted* specifications are ensured by design, or verified during production and calibration.

The following characteristic specifications describe values that are relevant to the use of the model under stated operating conditions but are not covered by the model warranty:

- *Typical* specifications describe the performance met by a majority of models.
- *Nominal* specifications describe an attribute that is based on design, conformance testing, or supplemental testing.
- *Measured* specifications describe the measured performance of a representative model.

Specifications in this document are *Typical* unless otherwise noted.

Conditions

Specifications are valid under the following conditions unless otherwise noted:

- Full bandwidth
- The Sample Clock is set to full rate.
- The module is warmed up for 10 minutes at ambient temperature.
- Self-calibration is completed after warm-up period.
- Calibration cycle is maintained.

Vertical

Analog Input

<table>

Maximum input overload

| Peaks | ≤ 30 V |

Accuracy

Resolution

8 bits

Accuracy\(^2\)

±(2% of input + 1% FS + 300 μV), warranted

DC drift

±(0.033% of input + 0.06% of FS + 40 μV) per °C, nominal

AC coupling cutoff (-3 dB)

12 Hz

---

1 Programmable Vertical Offset Accuracy: ±2 mV on 40 mV range, ±2.5% on all other ranges, warranted

2 Within 5 °C of self-calibration temperature.
Bandwidth and Transient Response

Bandwidth\(^3,4\) (-3 dB)

</table>

Analog Trigger (Edge, Window, and Hysteresis Trigger Types)

Sources  CH 0 (front panel BNC connector),
          CH 1 (front panel BNC connector)
Trigger level resolution  8 bits
Trigger level range  Same as input signal

Digital Trigger (Digital Trigger Type)

Sources  PFI 1

---

6 Input must meet 3.3 V CMOS Logic requirements.
7 If a digital trigger is being supplied through the PFI line, an external clock cannot be used.
Start Trigger

Table 3. Trigger Types and Sources

Power

| +5 V DC | 230 mA |
| Total power | 1.15 W |

Software

Driver Software

Driver support for this device was first available in NI-SCOPE 14.1.

NI-SCOPE is an IVI-compliant driver that allows you to configure, control, and calibrate the USB-5133. NI-SCOPE provides application programming interfaces for many development environments.

\(^9\) Warm-up begins after the NI-SCOPE driver is loaded.
Application Software

NI-SCOPE provides programming interfaces, documentation, and examples for the following application development environments:

- LabVIEW
- LabWindows™/CVI™
- Measurement Studio
- Microsoft Visual C/C++
- .NET (C# and VB.NET)

Related Information

For NI-SCOPE .NET support, visit ni.com.

Interactive Soft Front Panel and Configuration

When you install NI-SCOPE on a 64-bit system, you can monitor, control, and record measurements from the USB-5133 using InstrumentStudio.

InstrumentStudio is a software-based front panel application that allows you to perform interactive measurements on several different device types in a single program.

**Note** InstrumentStudio is supported only on 64-bit systems. If you are using a 32-bit system, use the NI-SCOPE–specific soft front panel instead of InstrumentStudio.

Interactive control of the USB-5133 was first available via InstrumentStudio in NI-SCOPE 18.1 and via the NI-SCOPE SFP in NI-SCOPE 3.5. InstrumentStudio and the NI-SCOPE SFP are included on the NI-SCOPE media.

NI Measurement & Automation Explorer (MAX) also provides interactive configuration and test tools for the USB-5133. MAX is included on the driver media.

### Cleaning Statement

**Notice** Clean the hardware with a soft, nonmetallic brush. Make sure that the hardware is completely dry and free from contaminants before returning it to service.

**Notice** If the USB-5133 is uninstalled, clean the hardware with a soft, nonmetallic brush. Make sure that the hardware is completely dry and free from contaminants before returning it to service.

### Dimensions and Weight

| Dimensions          | 18.49 × 3.38 × 10.29 cm  
|                    | (7.279 × 1.314 × 4.053 in.) |
| Weight             | 244 g (8.6 oz) |

### Environment

| Maximum altitude   | 2,000 m (at 25 °C ambient temperature) |
| Pollution Degree   | 2 |
Indoor use only.

**Compliance and Certifications**

**Safety Compliance Standards**

This product is designed to meet the requirements of the following electrical equipment safety standards for measurement, control, and laboratory use:

- IEC 61010-1, EN 61010-1
- UL 61010-1, CSA C22.2 No. 61010-1

**Electromagnetic Compatibility**

This product meets the requirements of the following EMC standards for electrical equipment for measurement, control, and laboratory use:

- EN 61326-1 (IEC 61326-1): Class A emissions; Basic immunity
- EN 55011 (CISPR 11): Group 1, Class A emissions
- AS/NZS CISPR 11: Group 1, Class A emissions
- FCC 47 CFR Part 15B: Class A emissions
- ICES-001: Class A emissions

**Note** In the United States (per FCC 47 CFR), Class A equipment is intended for use in commercial, light-industrial, and heavy-industrial locations. In Europe, Canada, Australia, and New Zealand (per CISPR 11), Class A equipment is intended for use only in heavy-industrial locations.
Note  Group 1 equipment (per CISPR 11) is any industrial, scientific, or medical equipment that does not intentionally generate radio frequency energy for the treatment of material or inspection/analysis purposes.

Note  For EMC declarations, certifications, and additional information, refer to the *Product Certifications and Declarations* section.

CE Compliance

This product meets the essential requirements of applicable European Directives, as follows:

- 2014/35/EU; Low-Voltage Directive (safety)
- 2014/30/EU; Electromagnetic Compatibility Directive (EMC)
- 2011/65/EU; Restriction of Hazardous Substances (RoHS)

Product Certifications and Declarations

Refer to the product Declaration of Conformity (DoC) for additional regulatory compliance information. To obtain product certifications and the DoC for NI products, visit [ni.com/product-certifications](http://ni.com/product-certifications), search by model number, and click the appropriate link.

Environmental Management

NI is committed to designing and manufacturing products in an environmentally responsible manner. NI recognizes that eliminating certain hazardous substances from our products is beneficial to the environment and to NI customers.

For additional environmental information, refer to the *Commitment to the Environment* web page at [ni.com/environment](http://ni.com/environment). This page contains the environmental regulations and directives with which NI complies, as well as other environmental information not included in this document.

Waste Electrical and Electronic Equipment (WEEE)

EU Customers  At the end of the product life cycle, all NI products must be disposed of according to local laws and regulations. For more information about how to recycle NI products in your region, visit [ni.com/environment/weee](http://ni.com/environment/weee).

电子信息产品污染控制管理办法（中国 RoHS）

中国客户  National Instruments 符合中国电子信息产品中限制使用某些有害物质指令（RoHS）。关于 National Instruments 中国 RoHS 合规性信息，请登录 [ni.com/environment/rohs_china](http://ni.com/environment/rohs_china)。 （For information about China RoHS compliance, go to [ni.com/environment/rohs_china](http://ni.com/environment/rohs_china).）
