DEVICE SPECIFICATIONS

NI PXI-2510
2 A Fault Insertion Unit

This document lists specifications for the NI PXI-2510 (NI 2510) matrix relay card. All specifications are subject to change without notice. Visit ni.com/manuals for the most current specifications.

Topology.................................................................................................................. Independent

Refer to the NI Switches Help for detailed topology information.

⚠️ Caution The protection provided by the NI 2510 can be impaired if it is used in a manner not described in this document.

About These Specifications

Specifications characterize the warranted performance of the instrument under the stated operating conditions.

© National Instruments
Typical Specifications are specifications met by the majority of the instrument under the stated operating conditions and are tested at 23 °C ambient temperature. Typical specifications are not warranted.

All voltages are specified in DC, AC\textsubscript{pk}, or a combination unless otherwise specified.

## Input Characteristics

### Maximum switching voltage

- Channel-to-channel........................................150 V
- Channel-to-ground........................................150 V, CAT I\textsuperscript{1}

\begin{itemize}
  \item **Caution** This module is rated for Measurement Category I and intended to carry signal voltages no greater than 150 V. This module can withstand up to 500 V impulse voltage. Do not use this module for connection to signals or for measurements within Categories II, III, or IV. Do not connect to MAINs supply circuits (for example, wall outlets) of 115 or 230 VAC.
  
  \item **Caution** When hazardous voltages (>42.4 V\textsubscript{pk}/60 VDC) are present on any relay terminal, safety low-voltage (<42.4 V\textsubscript{pk}/60 VDC) cannot be connected to any other relay terminal.
  
  \item **Caution** The maximum switching power is limited by the maximum switching current and the maximum voltage, and must not exceed 60 W.
\end{itemize}

### Maximum switching power (per channel)

- 60 W

\begin{itemize}
  \item **Note** This module and cable accessory can operate at various ambient temperatures and currents as shown in the following table.
\end{itemize}

\textsuperscript{1} Measurement Categories CAT I and CAT O (Other) are equivalent. These test and measurement circuits are not intended for direct connection to the MAINs building installations of Measurement Categories CAT II, CAT III, or CAT IV.

Minimum switch load........................................1 mA

Maximum DC path resistance (channel-to-DUT)

  - Initial...........................................................150 mΩ, typical
  - End-of-life.......................................................>1 Ω

**Note** DC path resistance typically remains low for the life of the relay. At the end of relay life, the path resistance rapidly rises above 1 Ω. Load ratings apply to relays used within the specification before the end of relay life.

Bandwidth, typical (50 Ω system)..........................>6.5 MHz^3

Dynamic Characteristics

Relay Operate Time^4

  - Typical.......................................................1 ms
  - Maximum......................................................3 ms

Expected mechanical relay life.........................1×10^8 cycles

Expected electrical relay life

  - 30 V, 1 A.......................................................5×10^5 cycles
  - 30 V, 2 A.......................................................1×10^5 cycles

Simultaneous drive limit.................................38 relays

**Note** Relays are field replaceable. Refer to the *NI Switches Help* for more information about replacing a failed relay.

---

2 Maximum 2 A per channel may be achieved with cable assembly with extra precaution on signal routing. See the *DIN160 Cable Installation Instructions* for more information.

3 The module is designed to carry communication signals such as CAN signals up to 1 Mbps and FlexRay signals up to 20 Mbps (10 Mbps per channel path).

4 Operate time is the time from the trigger received by hardware to relay output activation.
**Note** Certain applications may require additional time for proper settling. Refer to the *NI Switches Help* for more information about including additional settling time.

**Note** Opening a CHn to DUTn path counts toward the simultaneous drive limit.

### Trigger Characteristics

#### Input trigger

- **Sources**: PXI trigger lines <0..7>
- **Minimum pulse width**: 150 ns

**Note** The NI 2510 can recognize trigger pulse widths less than 150 ns if you disable digital filtering. Refer to the *NI Switches Help* for information about disabling digital filtering.

#### Output trigger

- **Destinations**: PXI trigger lines <0..7>
- **Pulse width**: Programmable (1 µs to 62 µs)

### Physical Characteristics

- **Relay type**: Electromechanical, non-latching
- **Relay contact material**: Palladium-ruthenium, gold covered
- **Front panel connector**: 160 DIN 41612, 160 positions, male

#### Power requirement

- **PXI**
  - 5 V, typical: 6.6 W
  - 3.3 V, typical: 0.48 W

#### Dimensions (L × W × H)

- 3U, one slot, PXI/cPCI module, 18.8 cm × 2.0 cm × 13.0 cm (7.4 in. × 0.8 in. × 5.1 in.)

#### Weight

- 358 g (12.6 oz)

### Environment

- **Operating temperature**: 0 °C to 55 °C
- **Storage temperature**: -40 °C to 70 °C
Relative humidity.................................5% to 85%, noncondensing
Pollution Degree.................................2
Maximum altitude...............................2,000 m

Indoor use only.

**Shock and Vibration**

Operational Shock.............................30 g peak, half-sine, 11 ms pulse (Tested in accordance with IEC 60068-2-27. Test profile developed in accordance with MIL-PRF-28800F.)

Random Vibration

  Operating.........................................5 to 500 Hz, 0.3 g_{rms}
  Nonoperating....................................5 to 500 Hz, 2.4 g_{rms} (Tested in accordance with IEC 60068-2-64. Nonoperating test profile exceeds the requirements of MIL-PRF-28800F, Class 3.)

**Diagrams**

The following figure shows the NI 2510 power-on state.
The following figure shows the NI 2510 connector pinout.
Accessories

You must install mating connectors according to local safety codes and standards and according to the specifications provided by the manufacturer. You are responsible for verifying the safety compliance of third-party connectors and their usage according to the relevant standard(s), including UL and CSA in North America and IEC and VDE in Europe.

Compliance and Certifications

Safety

This product is designed to meet the requirements of the following electrical equipment safety standards for measurement, control, and laboratory use:

- IEC 61010-1, EN 61010-1
- UL 61010-1, CSA 61010-1

**Note** For UL and other safety certifications, refer to the product label or the Online Product Certification section.

Electromagnetic Compatibility

This product meets the requirements of the following EMC standards for electrical equipment for measurement, control, and laboratory use:

- EN 61326-1 (IEC 61326-1): Class A emissions; Basic immunity
- EN 55011 (CISPR 11): Group 1, Class A emissions
- AS/NZS CISPR 11: Group 1, Class A emissions
- FCC 47 CFR Part 15B: Class A emissions
- ICES-001: Class A emissions

**Note** In the United States (per FCC 47 CFR), Class A equipment is intended for use in commercial, light-industrial, and heavy-industrial locations. In Europe, Canada, Australia, and New Zealand (per CISPR 11), Class A equipment is intended for use only in heavy-industrial locations.

**Note** Group 1 equipment (per CISPR 11) is any industrial, scientific, or medical equipment that does not intentionally generate radio frequency energy for the treatment of material or inspection/analysis purposes.

**Note** For EMC declarations, certifications, and additional information, refer to the Online Product Certification section.
CE Compliance

This product meets the essential requirements of applicable European Directives, as follows:

- 2006/95/EC; Low-Voltage Directive (safety)
- 2004/108/EC; Electromagnetic Compatibility Directive (EMC)

Online Product Certification

Refer to the product Declaration of Conformity (DoC) for additional regulatory compliance information. To obtain product certifications and the DoC for this product, visit [ni.com/certification](http://ni.com/certification), search by model number or product line, and click the appropriate link in the Certification column.

Environmental Management

NI is committed to designing and manufacturing products in an environmentally responsible manner. NI recognizes that eliminating certain hazardous substances from our products is beneficial to the environment and to NI customers.

For additional environmental information, refer to the Minimize Our Environmental Impact web page at [ni.com/environment](http://ni.com/environment). This page contains the environmental regulations and directives with which NI complies, as well as other environmental information not included in this document.

Waste Electrical and Electronic Equipment (WEEE)

**EU Customers** At the end of the product life cycle, all NI products must be disposed of according to local laws and regulations. For more information about how to recycle NI products in your region, visit [ni.com/environment/weee](http://ni.com/environment/weee).

电子信息产品污染控制管理办法（中国 RoHS）

**中国客户** National Instruments 符合中国电子信息产品中限制使用某些有害物质指令(RoHS)。关于 National Instruments 中国 RoHS 合规性信息，请登录 [ni.com/environment/rohs_china](http://ni.com/environment/rohs_china)。(For information about China RoHS compliance, go to [ni.com/environment/rohs_china](http://ni.com/environment/rohs_china).)
