INSTALLATION INSTRUCTIONS
Data Management Software Suite in the Evaluation Mode

Overview
Here are instructions for installing and configuring the Data Management Software Suite, which includes DataFinder Server, Analysis Server and DIAdem Advanced in the evaluation Mode.

The installation requires an internet connection.
1. Start the installation through the USB interface.

2. Click Install DataFinder Server & Analysis Server 2017 SP1.
3. Follow the instructions of the installation program.
4. After the reboot, a configuration assistant will automatically start and lead you through the basic setup. Starting the wizard may take a few minutes. If the TDM Server Control Panel does not start, please start the application manually.

5. A message box opens.

6. Click OK.

7. Please wait for the NI Web Server Guided Setup. Opening the associated configuration dialog box may take a few minutes. Select Help Me Choose a Preset to go through a series of questions to choose the right preset for your web server. Alternatively, select the server configuration preset to start with Insecure Remote Access if you want to access the TDM Server on your local network. The following steps describe the configuration with Insecure Remote Access.
8. Select **Insecure Remote Access** only if you are sure that you will access the TDM Server from the same machine.

9. Click **Next**.
10. Enter and confirm a password for the web administrator. You will need this password to log on to the TDM Server as administrator. The user name for the web administrator is “admin” and cannot be changed.

11. Click Next.
12. Select the HTTP port. Change the default port number only if there is another web server that uses this port number.

13. Click Next.
14. The configuration summary displays.

15. Click **Finish**.
16. The **TDM Server Control Panel** dialog box opens in the wizard mode.

17. If you want to review or modify your settings or if you want to make special settings, click **Configure**. If not, click **Continue**.

18. Configure the account under which the server runs. Select how to log on. Select **Local system account** if you do not need to process any files on the network with the TDM Server Suite.
19. Select **This account** and enter appropriate Windows credentials if you want to process any files on the network.

22. Click **Evaluate**.

23. Click **Yes**.

24. Follow the instructions of the **TDM Server Licensing Wizard**. This requires an internet connection. The wizard will ask you for your NI user account. Add all required pages as trusted sites.
25. After completing the installation go back to the **TDM Server Manager**.

26. Click **Open TDM Server Manager** to open the **TDM Server Manager** in the default internet browser. The user name for the web administrator is “admin”.
