

CLD Exam Preparation Course

Virtual Classroom

Overview

The CLD Exam Preparation Course teaches students what they need to know to prepare for the Certified LabVIEW Developer examination. Offered in a National Instruments virtual classroom, this course will discuss the topics most often missed on the written exam, and will demonstrate different solutions to a sample practical exam.

Duration – 4 hours

Audience

- Users pursuing the Certified LabVIEW Developer certification

Downloads Available

- LabVIEW 7.0 Evaluation Software
- Course kit including presentation used in course
- LabVIEW VIs used in course

Virtual Classroom

Virtual classes are held in an environment that simulates a real classroom. There is a live instructor who will speak to you using Voice Over IP (VOIP). You will be able to communicate with the instructor and other class participants via VOIP or using a text chat. The instructor will teach the class using slides, application sharing and quizzes. A recording of the class is made which you can later review online. Virtual classrooms reduce your training costs by eliminating travel and teleconferencing. You can take the class at the convenience of your desk, home, or on the road – anywhere you have Internet access.

- Practice your skills with sample exam questions
- Demonstrations provided for key points
- Watch as LabVIEW VIs are built and explained
- Work with other participants in breakout rooms

REGISTRATION

Register online at ni.com/training or call (800) 433-3488 • Fax: (512) 683-9300 info@ni.com
