Welcome to your CDP Climate Change Questionnaire 2023

C0. Introduction

C0.1

(C0.1) Give a general description and introduction to your organization.

National Instruments Corporation (NI) started over 40 years ago on an idea of connecting engineers through software. Our founders created technology to connect instruments to computers in order to accelerate the testing and measurement of innovative technology, and this was the seed of a philosophy of accelerating innovation that continues to be a driving force of our culture, our business, and our operations today. We strive to enable customers around the world to do their most ambitious work while meeting fast-moving market demands. We provide the integration of modular hardware and open, flexible software systems, to consistently support organizations’ evolving test and measurement needs. Our hope is that in 100 years’ time, future generations will continue to benefit from the results of the innovation we make possible today.

Our overarching goal, which we call our core strategic vision is to be the leader in software connected automated test and automated measurement systems. This vision provides a framework to help us achieve our financial goals of accelerated growth and enhanced profitability by:

• Delivering value that gives our customers a competitive advantage;
• Providing a differentiated software-defined platform for automated test and automated measurement systems;
• Focusing on industry-specific applications that benefit from our platform’s disruptive capabilities;
• Enhancing our system-level offerings to more fully meet customers’ enterprise-wide challenges; and
• Aligning resources to the critical needs of our growth strategy to drive efficiency in our cost structure.

In pursuing our vision, we have empowered our team to be deliberate about the market opportunities we pursue to accelerate growth by targeting the applications where we believe our systems can provide significant value to our customers. We believe our long-term track record for innovation and our differentiation in the market helps support the success of our customers, employees, community, and stockholders. “
## C0.2

(C0.2) State the start and end date of the year for which you are reporting data and indicate whether you will be providing emissions data for past reporting years.

<table>
<thead>
<tr>
<th>Reporting year</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Start date</strong></td>
</tr>
<tr>
<td><strong>End date</strong></td>
</tr>
</tbody>
</table>

**Indicate if you are providing emissions data for past reporting years**
- Yes

**Select the number of past reporting years you will be providing Scope 1 emissions data for**
- 3 years

**Select the number of past reporting years you will be providing Scope 2 emissions data for**
- 3 years

**Select the number of past reporting years you will be providing Scope 3 emissions data for**
- 3 years

## C0.3

(C0.3) Select the countries/areas in which you operate.

- Armenia
- Austria
- Belgium
- Brazil
- Canada
- China
- Colombia
- Costa Rica
- Czechia
- Denmark
- Finland
- France
- Germany
- Hong Kong SAR, China

C2.1b

(C2.1b) How does your organization define substantive financial or strategic impact on your business?

The organization's definition of substantive financial or strategic impact encompasses any action, event, or change that significantly modifies the operating environment, profitability, and long-term strategic positioning of the business.

C2.2

(C2.2) Describe your process(es) for identifying, assessing and responding to climate-related risks and opportunities.

Value chain stage(s) covered
- Direct operations
- Upstream
- Downstream

Risk management process
A specific climate-related risk management process

**Frequency of assessment**
Not defined

**Time horizon(s) covered**
- Short-term
- Medium-term
- Long-term

**Description of process**
Identifying Climate Risks

We have identified climate-related risks and opportunities by conducting a climate scenario analysis – using models laid out in the International Energy Agency’s World Energy Outlook report. Our scenario analysis provides a deeper understanding of the potential impact of climate change and how that may affect our company. In each of the sessions, we evaluated our resilience in the short-term (next 2-3 years), medium-term (through 2030) and long-term (2030 and beyond).

We evaluated the upstream, direct operations and downstream potential impacts in each of the three scenarios through the lens of our climate-neutral goal, looking at both transition risks and physical risks.

In mid-2023, NI plans to create a Sustainability Steering Committee. Chaired by the Head of Sustainability and made up of senior-level representatives from across the company, the Sustainability Steering Committee’s role will be to provide cross-functional support and decision-making to drive NI’s commitment to engineering a healthy planet. Members represent the various programmatic areas to set short-term targets, evaluate risks, share information, coordinate actions, and review progress.

The Steering Committee will have three associated work groups: Zero Waste, Circular Design, and Climate work groups. These work groups include subject matter experts and decision-makers from various parts of the business focused on specific Healthy Planet goal areas and they report their progress to the Steering Committee.

Managing Climate Risks

Identified climate risks are prioritized and managed by the business units within NI on an on-going basis. Top enterprise-level risks are communicated to the Board of Directors annually as part of our overall risk management process. Management of these risks occurs at the business unit level, with various teams coordinating responses as necessary.

Acute and chronic physical risks, for example, are managed by our facilities and procurement teams, among others. They have business continuity plans in place in the event of an extreme weather event and work with other teams throughout the company, like communications, manufacturing and HR, to coordinate appropriate responses.
We manage our reputational risks through transparent reporting, meaningful partnerships and a growing culture of sustainability among our employees. Please see NI's most recent CDP report for more information. Market risks, including changing policies, customer requirements, supply challenges and technological innovation, are closely monitored for appropriate responses by the affected business units.

The Sustainability Steering Committee will play an important role in coordinating the identification, prioritization and mitigation of climate risks once it is established.

**C2.2a**

(C2.2a) Which risk types are considered in your organization's climate-related risk assessments?

<table>
<thead>
<tr>
<th>Risk Type</th>
<th>Relevance &amp; Inclusion</th>
<th>Please Explain</th>
</tr>
</thead>
<tbody>
<tr>
<td>Current Regulation</td>
<td>Relevant, always included</td>
<td>Company is beholden to planned regulations from the SEC and could be open to reporting requirements in Europe.</td>
</tr>
<tr>
<td>Emerging Regulation</td>
<td>Relevant, always included</td>
<td>Increase in production of electric vehicles and battery technologies. As society transitions away from internal combustion engines, the demand for electric and autonomous vehicles is expected to increase significantly. This is creating a “race to the top,” with traditional companies investing heavily in research and development and new companies continuing to enter the marketplace. This transition goes well beyond passenger vehicles and extends to transportation, heavy industry, and military equipment. APPROACH: NI’s transportation business unit works closely with large vehicle manufacturers to help them test and validate electric and autonomous vehicle technology. This includes helping them modernize their battery test labs. NI has solutions installed at more than 80 OEMs and Tier 1 suppliers, with more than 20,000 battery test channels installed worldwide and decades of success automating test tasks. This helps customers accelerate time to market, reduce costs and optimize their test operations. Increase in use of semiconductors as society decarbonizes: Semiconductors are at the foundation of modern technology. As organizations around the world work to address climate change, semiconductors will continue to enable the acceleration and adoption of clean energy solutions.</td>
</tr>
<tr>

<td>Relevant, always included</td>
<td>Increase in use of semiconductors as society decarbonizes. Semiconductors are at the foundation of modern technology. As organizations around the world work to address climate change, semiconductors will continue to enable the acceleration and adoption of clean energy solutions.</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>---</td>
<td>---</td>
<td>---</td>
</tr>
</tbody>
</table>
| | | of sustainable technologies.
| | **APPROACH** | NI works with the industry to support these new technologies alongside the electrification and digitization of society. Internet of Things (IoT) and the infrastructure to support will be a key driver of a low-carbon economy, providing excellent opportunities for test and measurement as companies prioritize environmental issues and design in their products.

| Legal |  |
| |  |
| **Market** | Relevant, sometimes included | Increase in cost to purchase low- and zero-carbon materials and to produce products that use much less energy. We believe that, as the urgency of climate change increases, so too will the attempts to mitigate the damage. This could lead to regulations dictating material and performance standards as well as increased taxation of various commodities and services. We expect that, across time, incentives to decarbonize the economy will shift to regulation and taxation to impose limits and fund programs.

**APPROACH**
NI is already working on ways to deliver test and measurement using less energy. We are also investing in some low-carbon and recycled-content materials for products and packaging and will need to ramp that up in the coming decade. We monitor and work with our suppliers to understand the potential impacts of decarbonization on the cost and availability of materials in the future.

Increased adoption of low-carbon technologies
Both regulation and the marketplace continue to drive a transition to low-carbon technologies. Increasing fuel standards, changes in building requirements, and an evolution of consumer demand is driving interest in low- and zero-carbon materials and services. This is matched by expectations from employees that want to work for companies that are leading the way in decarbonizing the future.

**APPROACH**
NI’s climate-neutral goal will help drive our efforts to modernize equipment, invest in efficiency measures, and adopt renewable electricity purchases. Additionally, we have commitments to building (and retrofitting) our owned buildings to LEED and WELL standards. Both are helping us address this risk early while delivering on our goals, and we expect the early adoption to provide a return on the investment. We expect this process to continue through 2030 and beyond.
| Reputation | Relevant, always included | Increased stakeholder concern over climate action
Climate change is a global threat. The incidence of extreme weather events are visibly increasing and long-term impacts on biodiversity, ocean health, and livability are coming into sharper focus. The world is increasingly waking up to the realization that promises and goals are not worth much if not backed by action and progress. As consumer and corporate views on a brand’s responsibility to be part of the solution evolve, so too will their purchasing decisions. Companies that are actively addressing climate change with intention and honesty will be rewarded; laggards will face increasing market difficulties.

APPROACH
NI is committed to engineering a healthy planet. We have set an ambitious goal to become a climate-neutral company by 2030, operating in a way that produces no net greenhouse gas emissions (Scope 1+2). We believe strongly in the “less net, more zero” concept and are actively working to reduce our footprint through increased efficiency, a switch to electric vehicles and renewable energy, and conversion of heating away from natural gas where possible. Additionally, we are working on reducing the energy intensity of our products and we are committed to circular design strategies to reduce resource needs.

| Acute physical | Relevant, always included | Disruption to productivity in Malaysia is an important climate-related risk facing NI. Our manufacturing facility is one our largest sites in terms of square footage and the number of employees. Under all scenarios, the area faces extreme weather challenges as global temperatures rise.

APPROACH
Today, the impacts are minimal, but not zero. Penang’s airport is in a high-risk flood zone and experienced a flooded concourse in September 2022 after flash flooding. Our facilities team actively manages the risks today and has business continuity plans in place, but we need to do additional mitigation and adaptation planning for anticipated long-term impacts.

An increase in global temperatures and climate-related physical risks will likely lead to events that destabilize social order and threaten security. Food insecurity, resource shortages and natural disasters will likely lead to climate migration, civil unrest, and potential conflicts over resources.

APPROACH
NI helps enable these technologies needed for a country’s national defense. Military technologies, satellites, and space-based internet
connectivity can play a major role in predicting and monitoring climate events as well as coordinating disaster relief efforts.

| Chronic physical | Relevant, always included | Acute and chronic weather events across NI's global supply chain could cause disruptions in goods and services being delivered, as well as increased costs for those goods and services. Additionally, water scarcity is a risk for some of our suppliers who rely heavily on groundwater draws for processing materials. |

**APPROACH**
We conduct a risk analysis of our suppliers across multiple categories; these analyses are reviewed regularly. Additionally, we expect our suppliers to adhere to the same environmental standards that NI does, which are designed to mitigate our impact on the environment.

**C2.3**

(C2.3) Have you identified any inherent climate-related risks with the potential to have a substantive financial or strategic impact on your business?

No

**C2.3b**

(C2.3b) Why do you not consider your organization to be exposed to climate-related risks with the potential to have a substantive financial or strategic impact on your business?

<table>
<thead>
<tr>

Physical climate scenarios RCP 2.6 | Country/area | Analyzing potential climate related physical risks on key geographical regions for the business including the company's headquarters in Austin, TX and main manufacturing facilities in Hungary and Malaysia.

Physical climate scenarios RCP 4.5 | Country/area | Analyzing potential climate related physical risks on key geographical regions for the business including the company's headquarters in Austin, TX and main manufacturing facilities in Hungary and Malaysia.

Physical climate scenarios RCP 8.5 | Country/area | Analyzing potential climate related physical risks on key geographical regions for the business including the company's headquarters in Austin, TX and main manufacturing facilities in Hungary and Malaysia.

**C3.2b**

(C3.2b) Provide details of the focal questions your organization seeks to address by using climate-related scenario analysis, and summarize the results with respect to these questions.

Row 1

**Focal questions**

What are the key transition and physical climate related risks and opportunities facing our business and value chain over the short-term (next 2-3 years), medium-term (through 2030) and long-term (2030 and beyond)?

**Results of the climate-related scenario analysis with respect to the focal questions**

The analysis above shows that, without taking action, NI faces a moderate risk in terms of both physical and transitional factors. In the short term, the climate-related challenges and opportunities are minimal, but the actions we (and the rest of the planet) take now will define the road ahead.

We continue to evaluate the risks and opportunities and are formulating a long-term climate transition strategy. We already have set a net-zero Scope 1+2 emissions goal for 2030 and encourage all other businesses to join us in setting similar goals.

In the Stated Policies scenario, we would face increasing physical risks that will have a negative impact on our operations, our supply chain, and the marketplace as a whole. In the Announced Policies scenario, we would expect similar though slightly less frequent/severe physical risks with an increase in our transition risks and opportunities.
The Net Zero scenario would see the least physical risk while it would greatly increase our transition risks and opportunities.

In all scenarios, we expect supply costs to increase, scaling faster in the Stated policies and Announced Pledges scenarios.

**C3.3**

(C3.3) Describe where and how climate-related risks and opportunities have influenced your strategy.

Base year emissions covered by target in all selected Scopes as % of total base year emissions in all selected Scopes

Target year
2030

Targeted reduction from base year (%)
100

Total emissions in target year covered by target in all selected Scopes (metric tons CO2e) [auto-calculated]

Scope 1 emissions in reporting year covered by target (metric tons CO2e)
906

Scope 2 emissions in reporting year covered by target (metric tons CO2e)
15,458

Scope 3, Category 1: Purchased goods and services emissions in reporting year covered by target (metric tons CO2e)
Scope 3, Category 2: Capital goods emissions in reporting year covered by target (metric tons CO2e)

Scope 3, Category 3: Fuel-and-energy-related activities (not included in Scopes 1 or 2) emissions in reporting year covered by target (metric tons CO2e)

Scope 3, Category 4: Upstream transportation and distribution emissions in reporting year covered by target (metric tons CO2e)

Scope 3, Category 5: Waste generated in operations emissions in reporting year covered by target (metric tons CO2e)

Scope 3, Category 6: Business travel emissions in reporting year covered by target (metric tons CO2e)

Scope 3, Category 7: Employee commuting emissions in reporting year covered by target (metric tons CO2e)

Scope 3, Category 8: Upstream leased assets emissions in reporting year covered by target (metric tons CO2e)

Scope 3, Category 9: Downstream transportation and distribution emissions in reporting year covered by target (metric tons CO2e)

Scope 3, Category 10: Processing of sold products emissions in reporting year covered by target (metric tons CO2e)

Scope 3, Category 11: Use of sold products emissions in reporting year covered by target (metric tons CO2e)

Scope 3, Category 12: End-of-life treatment of sold products emissions in reporting year covered by target (metric tons CO2e)

Scope 3, Category 13: Downstream leased assets emissions in reporting year covered by target (metric tons CO2e)
Scope 3, Category 14: Franchises emissions in reporting year covered by target (metric tons CO2e)

Scope 3, Category 15: Investments emissions in reporting year covered by target (metric tons CO2e)

Scope 3, Other (upstream) emissions in reporting year covered by target (metric tons CO2e)

Scope 3, Other (downstream) emissions in reporting year covered by target (metric tons CO2e)

Total Scope 3 emissions in reporting year covered by target (metric tons CO2e)

Total emissions in reporting year covered by target in all selected scopes (metric tons CO2e)

Does this target cover any land-related emissions?
No, it does not cover any land-related emissions (e.g. non-FLAG SBT)

% of target achieved relative to base year [auto-calculated]

Target status in reporting year
Underway

Please explain target coverage and identify any exclusions
NI has a goal to become a climate-neutral company by 2030. We base this ambition on achieving net-zero Scope 1 and Scope 2 greenhouse gas emissions.

Plan for achieving target, and progress made to the end of the reporting year
We are in the process of identifying interim targets, such as for the percentage of renewably sourced electricity. Additionally, we consider Scope 3 emissions to be an important part of our overall footprint and are working toward identifying, measuring and reducing the most material categories

List the emissions reduction initiatives which contributed most to achieving this target
C4.2

(C4.2) Did you have any other climate-related targets that were active in the reporting year?
No other climate-related targets

C4.3

(C4.3) Did you have emissions reduction initiatives that were active within the reporting year? Note that this can include those in the planning and/or implementation phases.
Yes

C4.3a

(C4.3a) Identify the total number of initiatives at each stage of development, and for those in the implementation stages, the estimated CO2e savings.

<table>
<thead>
<tr>
<th>Number of initiatives</th>
<th>Total estimated annual CO2e savings in metric tonnes CO2e (only for rows marked *)</th>

Evaluation status
Relevant, not yet calculated
Please explain

Waste generated in operations

Evaluation status
Relevant, calculated

Emissions in reporting year (metric tons CO2e)
355.744

Emissions calculation methodology
Waste-type-specific method

Percentage of emissions calculated using data obtained from suppliers or value chain partners
0

Please explain
Waste and recycling data is collected by quantifying the volume of waste being sent to landfill and being recycled and then converted to mass.

Business travel

Evaluation status
Relevant, calculated

Emissions in reporting year (metric tons CO2e)
3,380.66

Emissions calculation methodology
Spend-based method

Percentage of emissions calculated using data obtained from suppliers or value chain partners
0

Please explain
Dollars spent on rental cars, mileage reimbursements and gasoline are converted to miles traveled and gallons of fuel used based on averages, and then quantified into emissions using appropriate emission factors. Dollars spent on airfare, public transportation and all other travel is quantified using the Scope 3 Evaluator Tool.

Employee commuting

Evaluation status
Relevant, calculated

Emissions in reporting year (metric tons CO2e)
3,233.628

Emissions calculation methodology
Distance-based method

**Percentage of emissions calculated using data obtained from suppliers or value chain partners**

0

**Please explain**

Utilized employee surveys to estimate total mileage and then quantified into emissions using appropriate emission factors. Includes estimated emissions based on the total number of days worked from home for all employees.

**C7.6**

**(C7.6) Indicate which gross global Scope 2 emissions breakdowns you are able to provide.**

By facility

**C7.6b**

**(C7.6b) Break down your total gross global Scope 2 emissions by business facility.**
Facility | Scope 2, location-based (metric tons CO2e) | Scope 2, market-based (metric tons CO2e)
--- | --- | ---
Germany | 62.928 | 41.532
United States | 8,242.802 | 6,852.635
Costa Rica | 0.809 | 0.809
Taiwan | 83.557 | 83.557
Hungary | 2,596.205 | 2,596.205
India | 68.666 | 68.666
United Kingdom | 52.62 | 52.62
Japan | 176.461 | 176.461
Malaysia | 6,424.517 | 4,903.667
China | 35.035 | 35.035
Israel | 92.448 | 92.448
Romania | 52.175 | 52.175
Armenia | 48.635 | 48.635

C7.7

(C7.7) Is your organization able to break down your emissions data for any of the subsidiaries included in your CDP response?

C7.9

(C7.9) How do your gross global emissions (Scope 1 and 2 combined) for the reporting year compare to those of the previous reporting year?

Decreased

C7.9a

(C7.9a) Identify the reasons for any change in your gross global emissions (Scope 1 and 2 combined), and for each of them specify how your emissions compare to the previous year.

<table>
<thead>
<tr>
<th>Change in emissions (metric tons CO2e)</th>

</tr>
<tr>
<td>Scope 3</td>
</tr>
<tr>
<td>No third-party verification or assurance</td>
</tr>
</tbody>
</table>
C10.2

(C10.2) Do you verify any climate-related information reported in your CDP disclosure other than the emissions figures reported in C6.1, C6.3, and C6.5?

C11. Carbon pricing

C11.1

(C11.1) Are any of your operations or activities regulated by a carbon pricing system (i.e. ETS, Cap & Trade or Carbon Tax)?
   No, and we do not anticipate being regulated in the next three years

C11.2

(C11.2) Has your organization canceled any project-based carbon credits within the reporting year?
   No

C11.3

(C11.3) Does your organization use an internal price on carbon?
   No, and we do not currently anticipate doing so in the next two years

C12. Engagement

C12.1

(C12.1) Do you engage with your value chain on climate-related issues?
   No, we do not engage

C12.1e

(C12.1e) Why do you not engage with any elements of your value chain on climate-related issues, and what are your plans to do so in the future?
   Intend to engage in an assessment of climate-related risks within our value chain to develop a strategy for engaging with suppliers and work with them to commit to tracking and reporting.

C12.2

(C12.2) Do your suppliers have to meet climate-related requirements as part of your organization’s purchasing process?
   No, and we do not plan to introduce climate-related requirements within the next two years
C12.3

(C12.3) Does your organization engage in activities that could either directly or indirectly influence policy, law, or regulation that may impact the climate?

Row 1

External engagement activities that could directly or indirectly influence policy, law, or regulation that may impact the climate

Does your organization have a public commitment or position statement to conduct your engagement activities in line with the goals of the Paris Agreement?

Describe the process(es) your organization has in place to ensure that your external engagement activities are consistent with your climate commitments and/or climate transition plan

C12.4

(C12.4) Have you published information about your organization’s response to climate change and GHG emissions performance for this reporting year in places other than in your CDP response? If so, please attach the publication(s).

C12.5

(C12.5) Indicate the collaborative frameworks, initiatives and/or commitments related to environmental issues for which you are a signatory/member.

<table>
<thead>
<tr>
<th>Environmental collaborative framework, initiative and/or commitment</th>
<th>Describe your organization’s role within each framework, initiative and/or commitment</th>
</tr>
</thead>
<tbody>
<tr>
<td>Row 1</td>
<td></td>
</tr>
</tbody>
</table>

C15. Biodiversity

C15.1

(C15.1) Is there board-level oversight and/or executive management-level responsibility for biodiversity-related issues within your organization?
### Board-level oversight and/or executive management-level responsibility for biodiversity-related issues

<table>
<thead>
<tr>
<th>Row</th>
<th>Description of oversight and objectives relating to biodiversity</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Yes, board-level oversight</td>
</tr>
</tbody>
</table>

At the moment, only providing annual updates on activities related to protecting biodiversity as part of stated corporate impact goal to protect biodiversity. The board has oversight of all corporate impact goals.

### C15.2

(C15.2) Has your organization made a public commitment and/or endorsed any initiatives related to biodiversity?

<table>
<thead>
<tr>
<th>Indicate whether your organization made a public commitment or endorsed any initiatives related to biodiversity</th>
<th>Initiatives endorsed</th>
</tr>
</thead>
<tbody>
<tr>
<td>Yes, we have endorsed initiatives only</td>
<td>SDG</td>
</tr>
</tbody>
</table>

### C15.3

(C15.3) Does your organization assess the impacts and dependencies of its value chain on biodiversity?

#### Impacts on biodiversity

<table>
<thead>
<tr>
<th>Indicate whether your organization undertakes this type of assessment</th>
</tr>
</thead>
<tbody>
<tr>
<td>No and we don’t plan to within the next two years</td>
</tr>
</tbody>
</table>

#### Dependencies on biodiversity

<table>
<thead>
<tr>
<th>Indicate whether your organization undertakes this type of assessment</th>
</tr>
</thead>
<tbody>
<tr>
<td>No and we don’t plan to within the next two years</td>
</tr>
</tbody>
</table>

### C15.4

(C15.4) Does your organization have activities located in or near to biodiversity-sensitive areas in the reporting year?

No

### C15.5

(C15.5) What actions has your organization taken in the reporting year to progress your biodiversity-related commitments?

Have you taken any actions in the reporting period to progress your biodiversity-related commitments?
Row 1  | No, we are not taking any actions to progress our biodiversity-related commitments

### C15.6

(C15.6) Does your organization use biodiversity indicators to monitor performance across its activities?

<table>
<thead>
<tr>
<th>Does your organization use indicators to monitor biodiversity performance?</th>
<th>Indicators used to monitor biodiversity performance</th>
</tr>
</thead>
<tbody>
<tr>
<td>Row 1</td>
<td>No</td>
</tr>
</tbody>
</table>

### C15.7

(C15.7) Have you published information about your organization's response to biodiversity-related issues for this reporting year in places other than in your CDP response? If so, please attach the publication(s).

<table>
<thead>
<tr>
<th>Report type</th>
<th>Content elements</th>
<th>Attach the document and indicate where in the document the relevant biodiversity information is located</th>
</tr>
</thead>
<tbody>
<tr>
<td>No publications</td>
<td></td>
<td></td>
</tr>
<tr>
<td>No publications</td>
<td></td>
<td></td>

</table>

### C16. Signoff

**C-FI**

(C-FI) Use this field to provide any additional information or context that you feel is relevant to your organization's response. Please note that this field is optional and is not scored.

### C16.1

(C16.1) Provide details for the person that has signed off (approved) your CDP climate change response.

<table>
<thead>
<tr>
<th>Job title</th>
<th>Corresponding job category</th>
</tr>
</thead>
</table>
SC. Supply chain module

SC0.0

(SC0.0) If you would like to do so, please provide a separate introduction to this module.

SC0.1

(SC0.1) What is your company’s annual revenue for the stated reporting period?

<table>
<thead>
<tr>
<th>Annual Revenue</th>
</tr>
</thead>
<tbody>
<tr>
<td>Row 1</td>
</tr>
</tbody>
</table>

SC1.1

(SC1.1) Allocate your emissions to your customers listed below according to the goods or services you have sold them in this reporting period.

SC1.2

(SC1.2) Where published information has been used in completing SC1.1, please provide a reference(s).

SC1.3

(SC1.3) What are the challenges in allocating emissions to different customers, and what would help you to overcome these challenges?

<table>
<thead>
<tr>
<th>Allocation challenges</th>
<th>Please explain what would help you overcome these challenges</th>
