# DAIMsphere – Data Aggregation and Information Mining

A commercial solution for SystemLink™ based test data management

Dr. rer. nat. Fabian Wehnekamp  
NI Connect Austin, Texas, USA / May 23, 2023

# DAIMsphere for Testing Solutions

A commercially available IIoT solution based on SystemLink™

# DAIMsphere Value Proposition

Test Data Management along the Product Life Cycle

**The integration of DAIMsphere leads to valuable benefits:**

- ✓ Concurrent engineering through real-time monitoring of test data
- ✓ Business value through reduced cost of non-quality
- ✓ Operational value with process stability, digitalisation and IT security across the board
- ✓ Data export capabilities

*“How does DAIMsphere work and how can you benefit from it?!”*

# Agenda

About HENSOLDT

The Challenge

Our Solution: DAIMsphere

Summary Value Proposition

# About HENSOLDT

# About HENSOLDT

**Together we make  
the difference for a  
safer tomorrow.**

Pure-play and platform independent provider of sensor solutions for defence and security applications

Addressing multiple attractive markets with state-of-the-art technology in the fields of radar, electronic warfare, avionics, and optronics

European roots, international footprint with production facilities in Germany, France, UK and South Africa as well as sales offices on six continents

# Key figures

Based on the fiscal year 2022

**6,463**

Employees worldwide

**152**

Years of heritage

**1,707**

Revenues in € m

**5,366**

Order backlog in € m

**1,993**

Order intake in € m

**292**

Adjusted EBITDA in € m

# Global footprint

More than 6,400 employees across the globe

**Norway**  
Oslo

**Netherlands**  
Rotterdam

**France**  
Toulouse, Plaisir, Massy,  
La Couronne, Epreville

**United Kingdom**  
Enfield

**Spain**  
Madrid

**Canada**  
Ottawa, Toronto

**USA**  
Vienna, VA  
Sarasota, FL

**Mexico**

# Our business

## Solutions

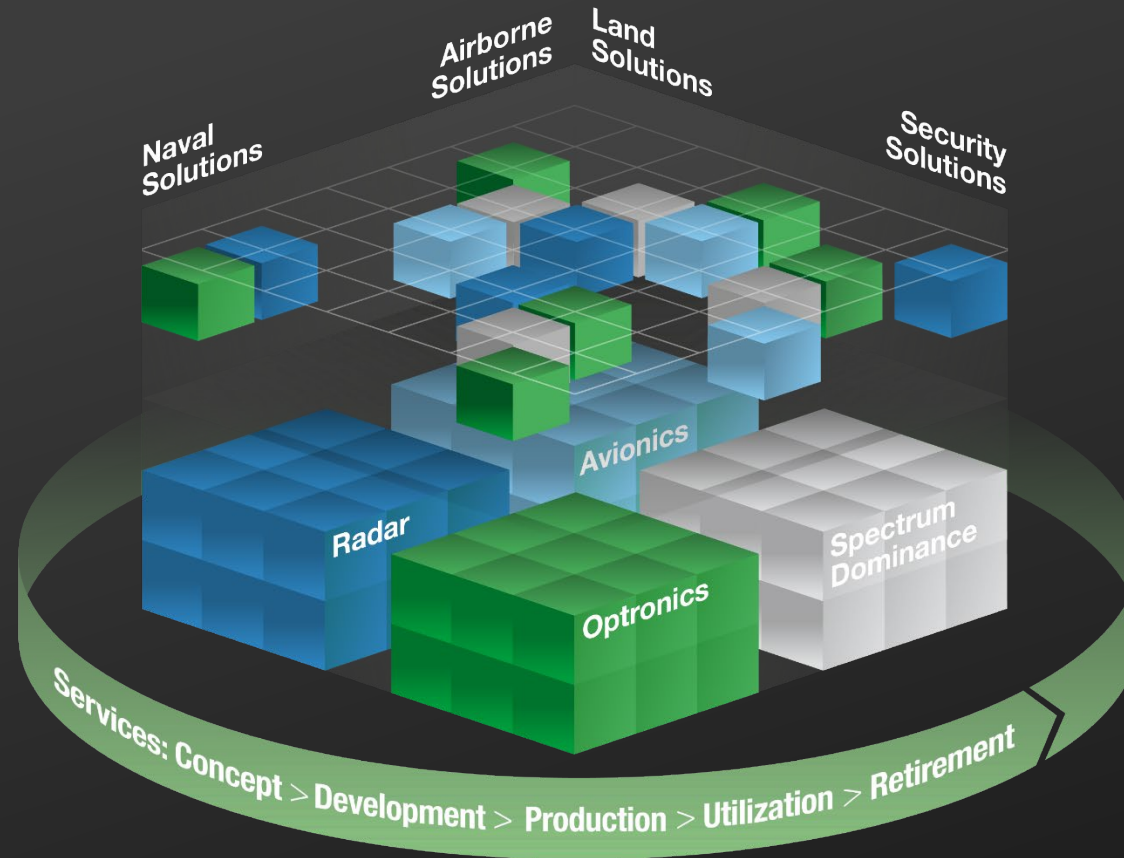

Networked, pre-integrated sensor solutions

## Products

Premium sensor systems and electronics

## Services

Services for the entire product life-cycle

## Testing Solutions...

...along the entire life cycle of our products are part of our HENSOLDT DNA with 30+ years of experience in testing

# The Challenge

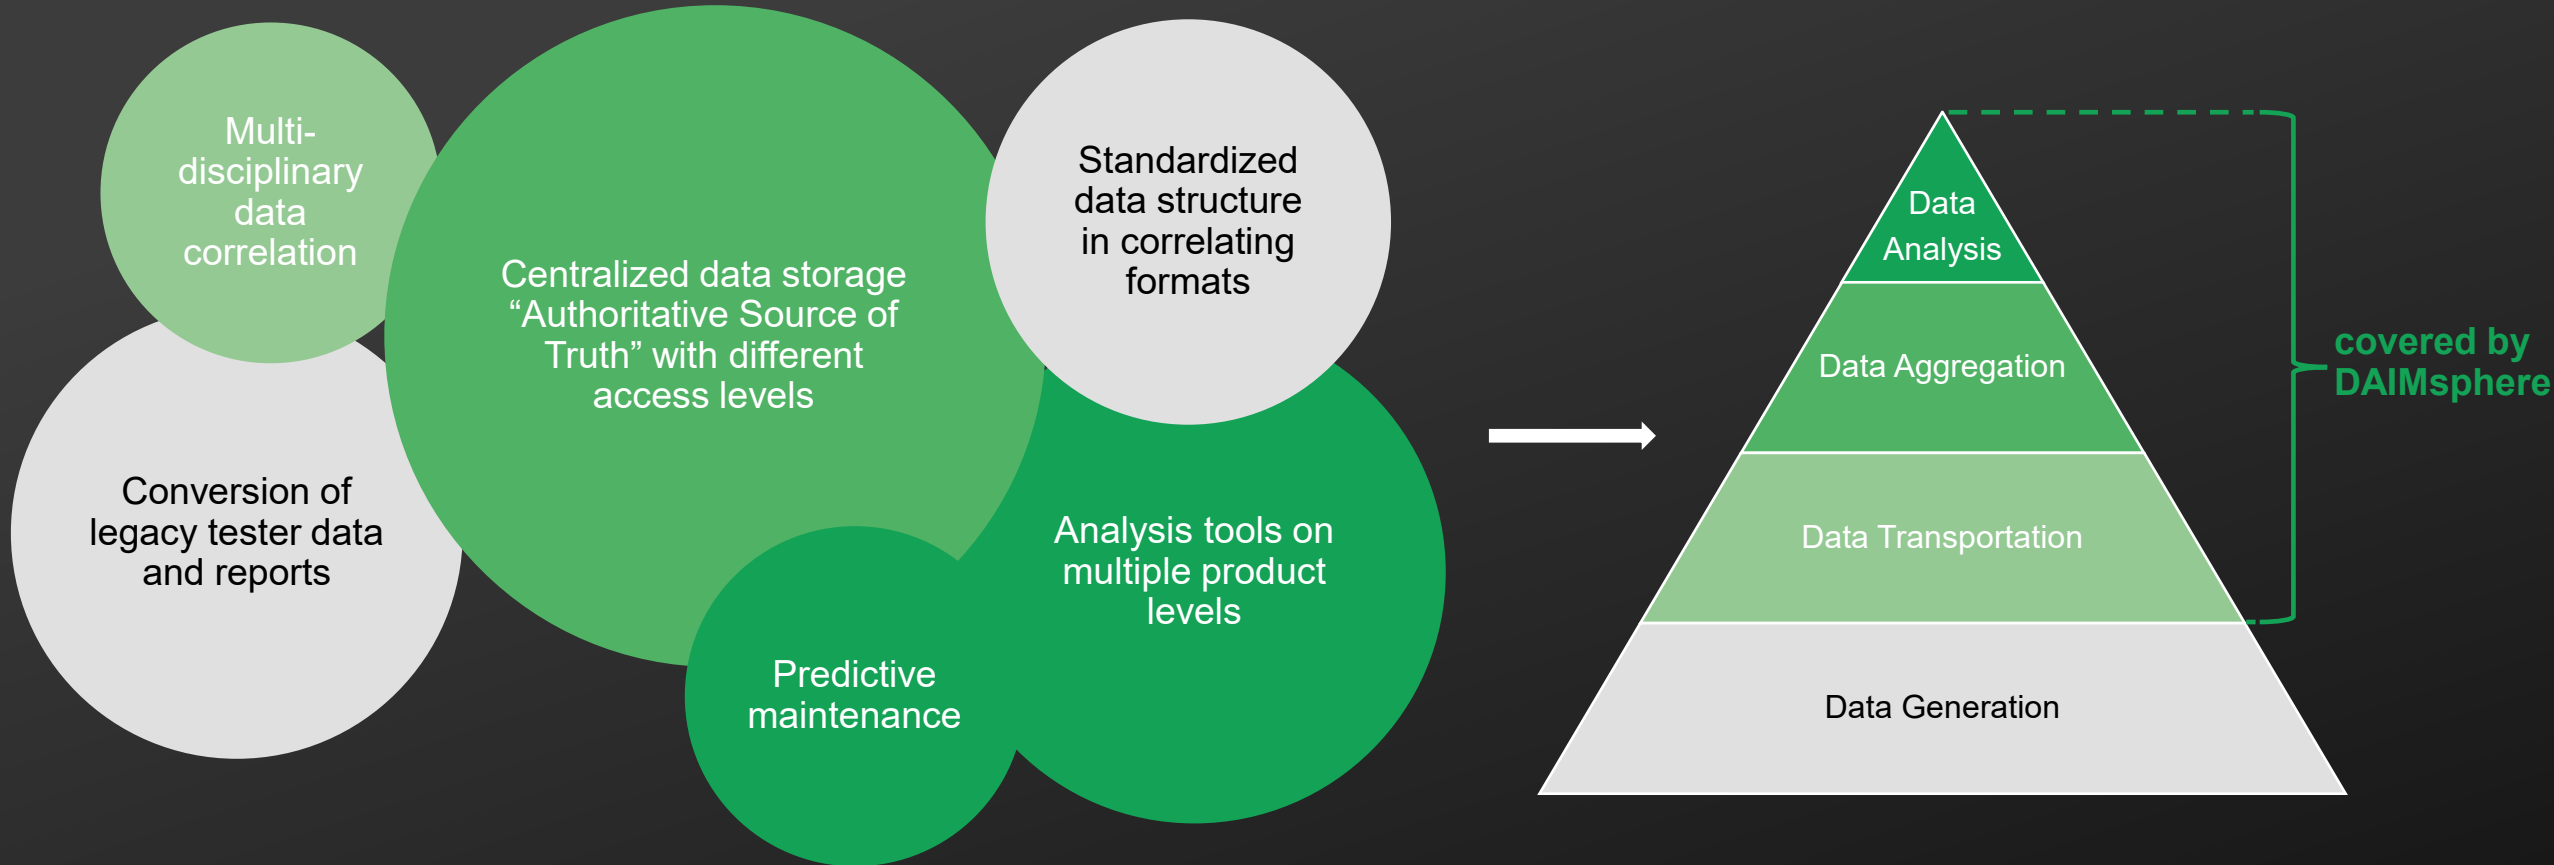

# Where we started

Pain points: More complex systems, shrinking time & budgets, managing data remains the real challenge

# Where we are

Goal: To cover the whole test data life cycle within the enterprise

# Our Solution: DAIMsphere

# DAIMsphere software layer structure

Layered approach allows extensions for specific enterprise requirements

## DAIMsphere Enterprise Layer:

- Database integration
- Data lake Integration
- Custom extensive analysis capabilities

## DAIMsphere Product Layer:

- DAIM abstraction layer
- DAIM analysis components
- GDPR conformity & rights management
- Deployment tools

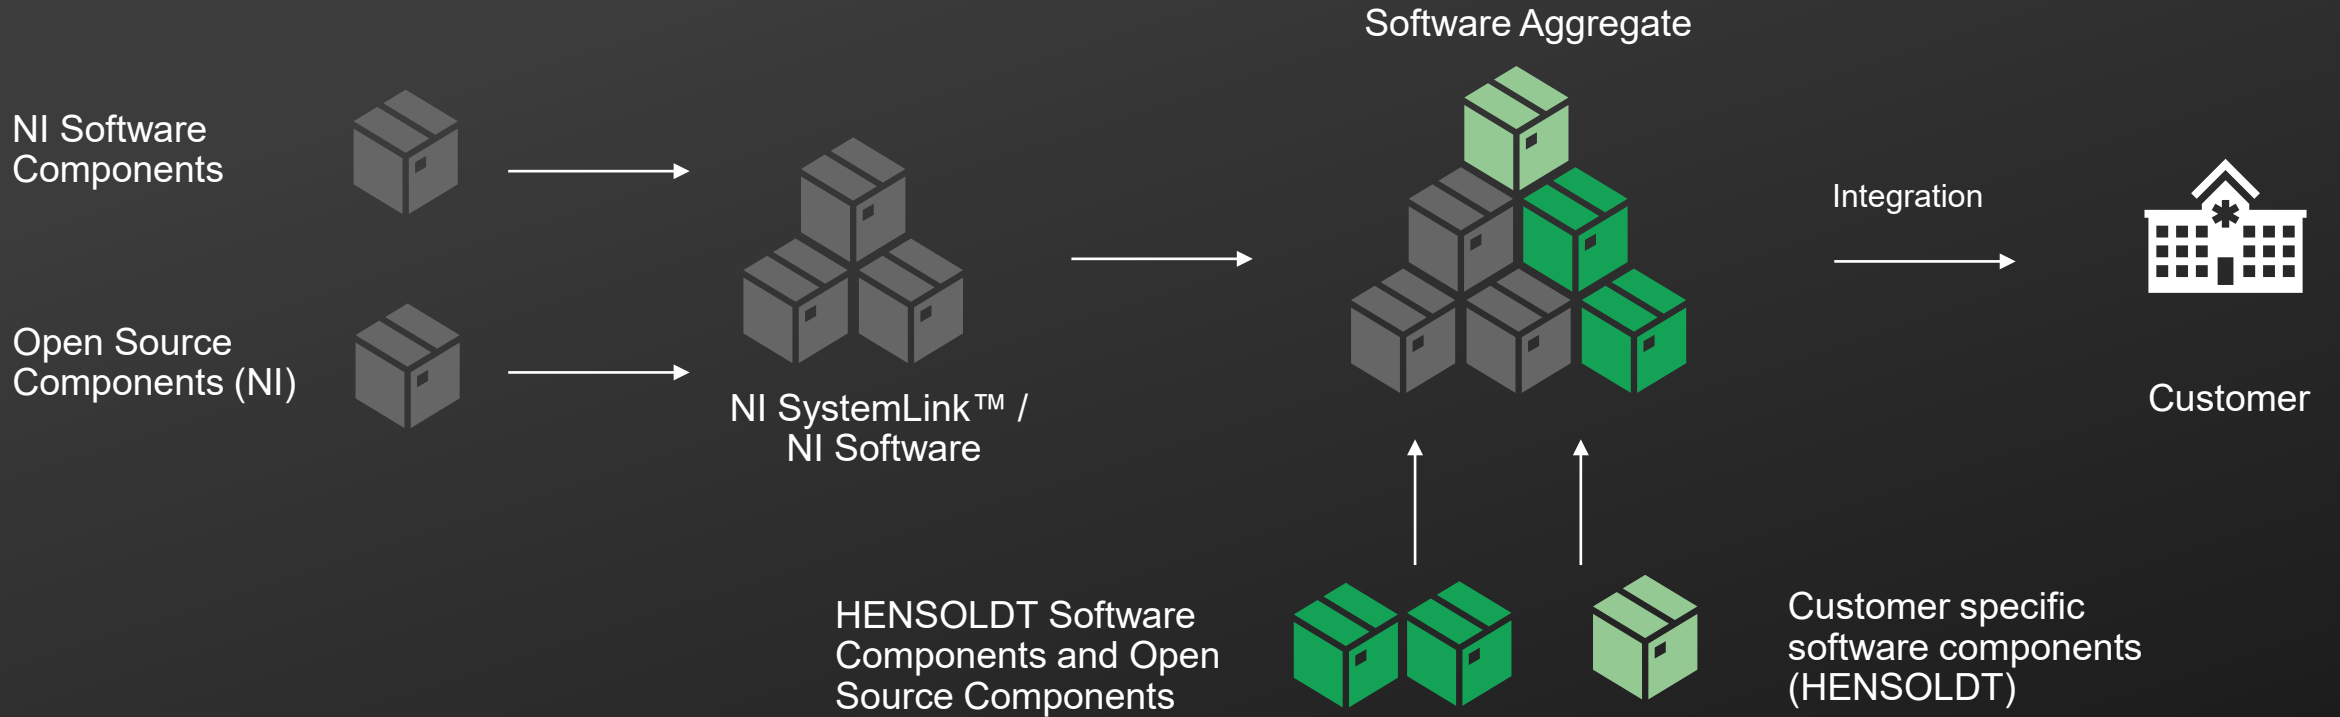

## NI SystemLink™ Layer:

- Commercial of the shelf  
Components provided by NI

# From NI SystemLink™ to DAIMsphere

Extending the COTS base functionality with custom software components

# DAIM Package Deployment

| <input type="checkbox"/>            | TRM-Server-Installer                        | HENSOLDT   | Application Software | 1.0.1.6    |

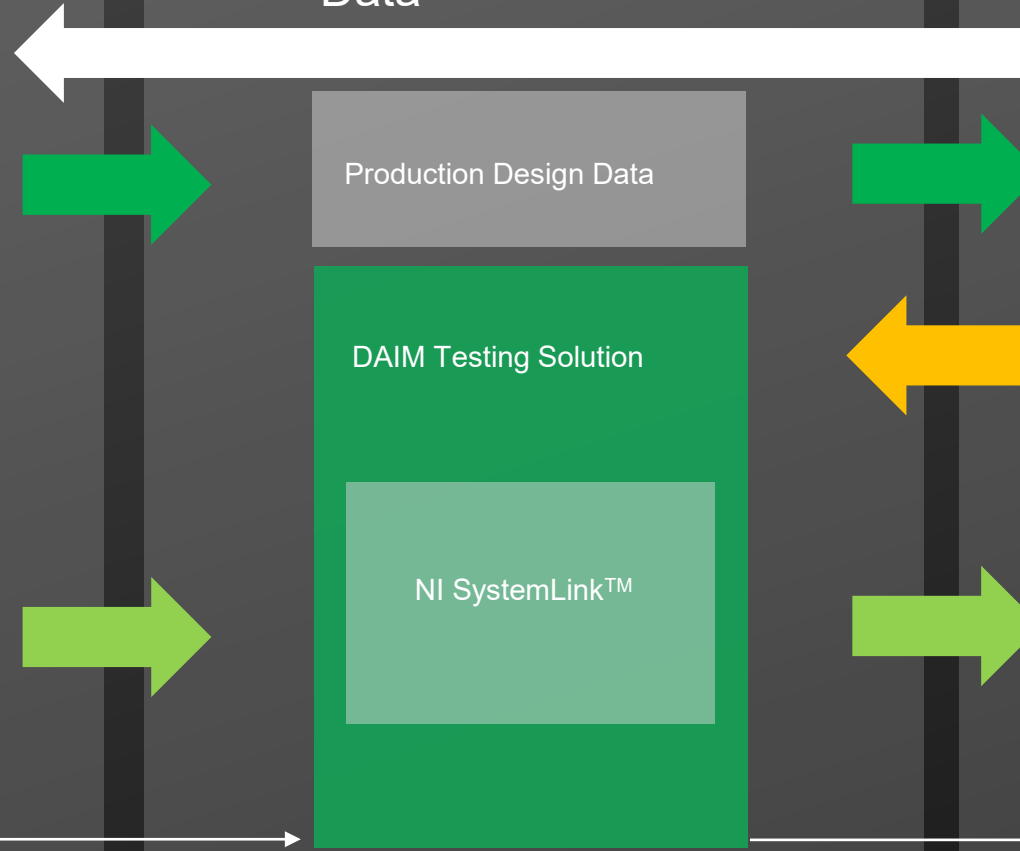

# Integration of DAIMsphere within the production stage

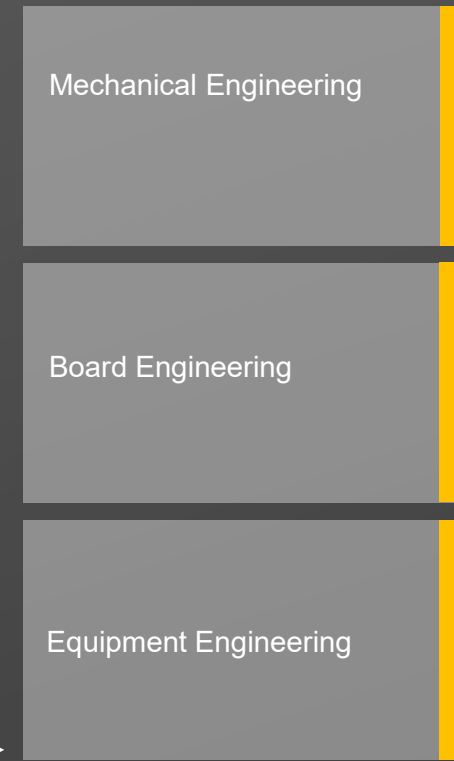

## Production Flow

## Data

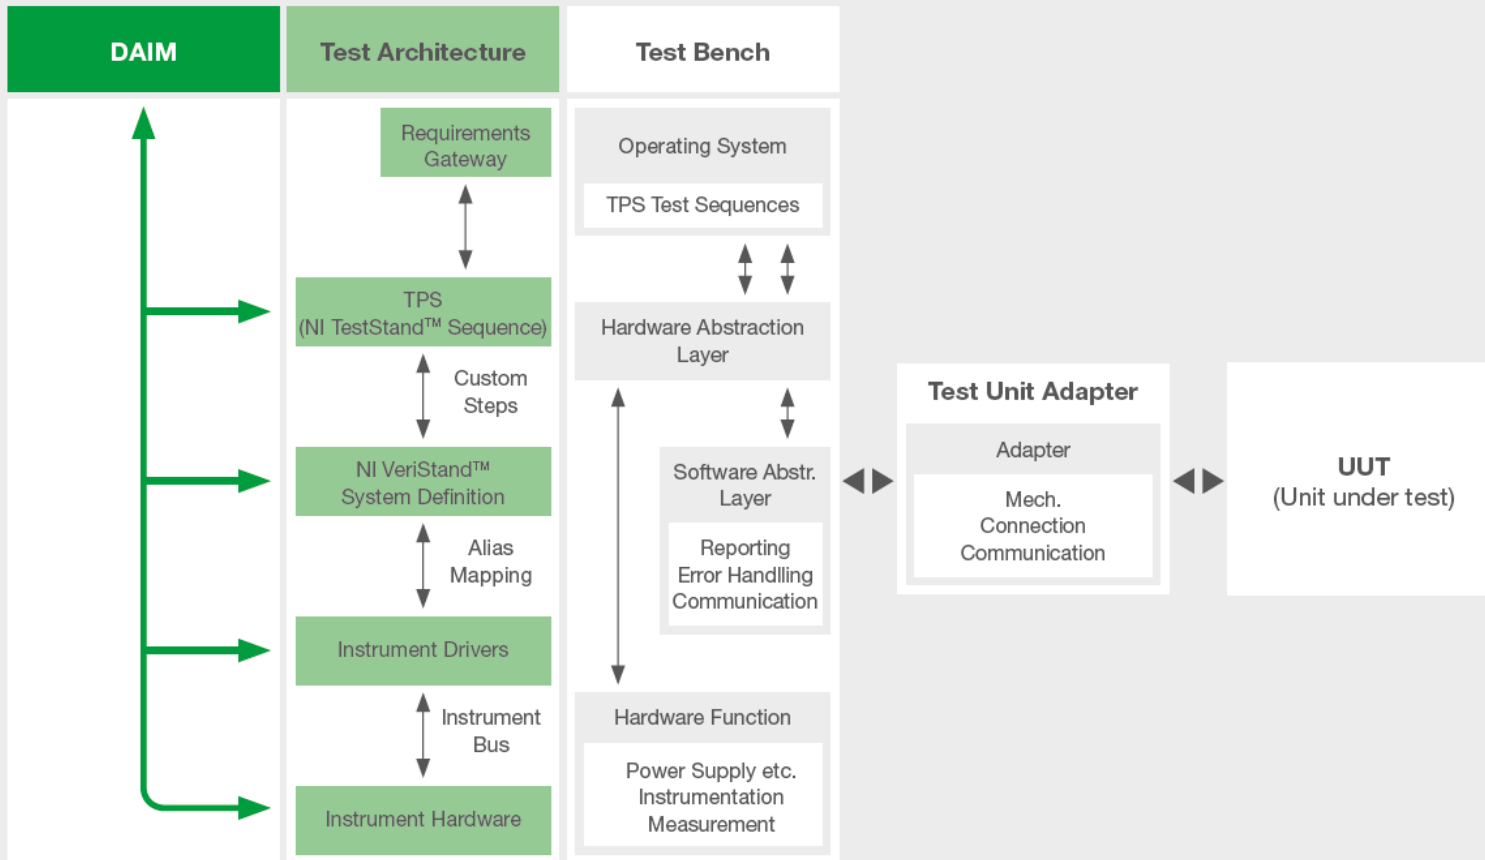

## Engineering

# The Data Flow Layers

# Data Generation: Exemplary @ HENSOLDT

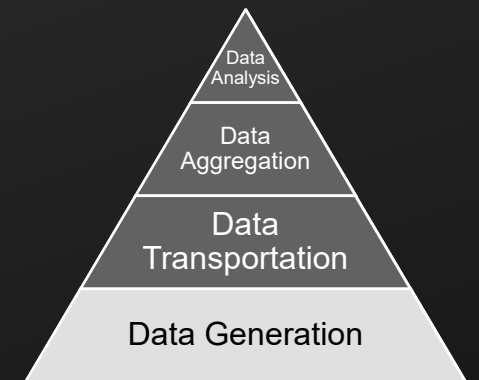

Multiple data sources lead to multiple data formats

- Inhouse developed tester with standard test framework TAC (Test Automation Center)
- Legacy Tester
- Test systems developed from other companies and integrated in production landscape

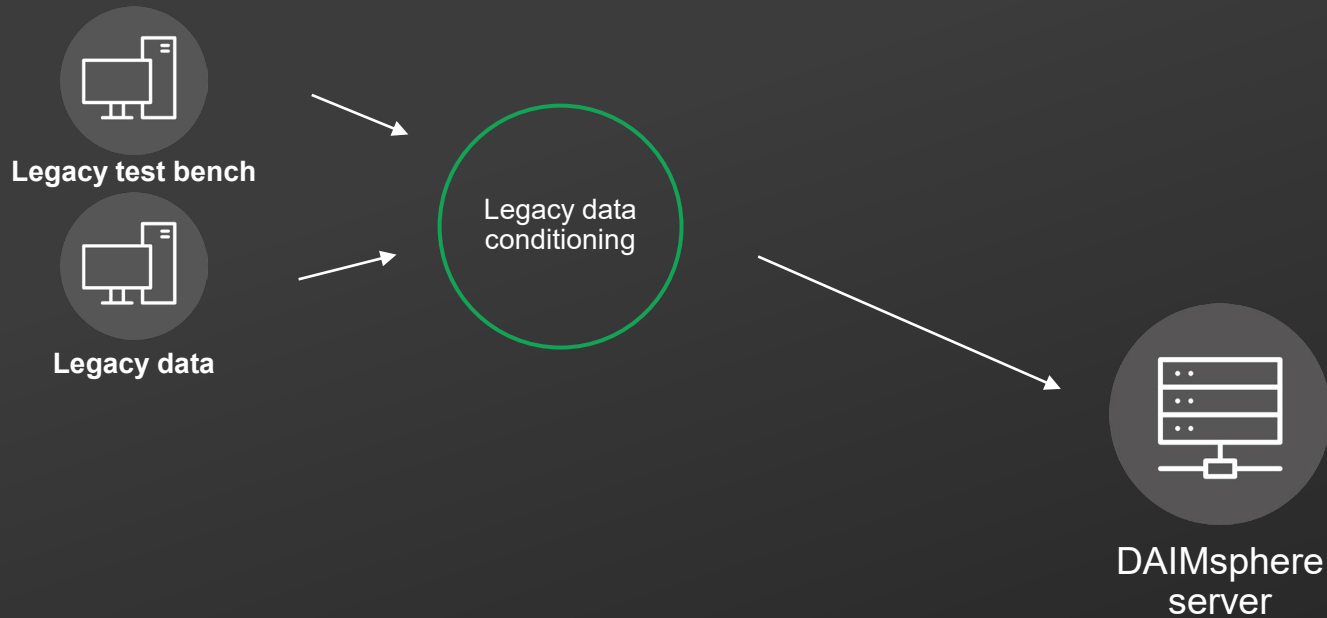

→ Multiple file formats

→ Multiple report formats

# Data Transportation

Infrastructure to collect data from multiple sources

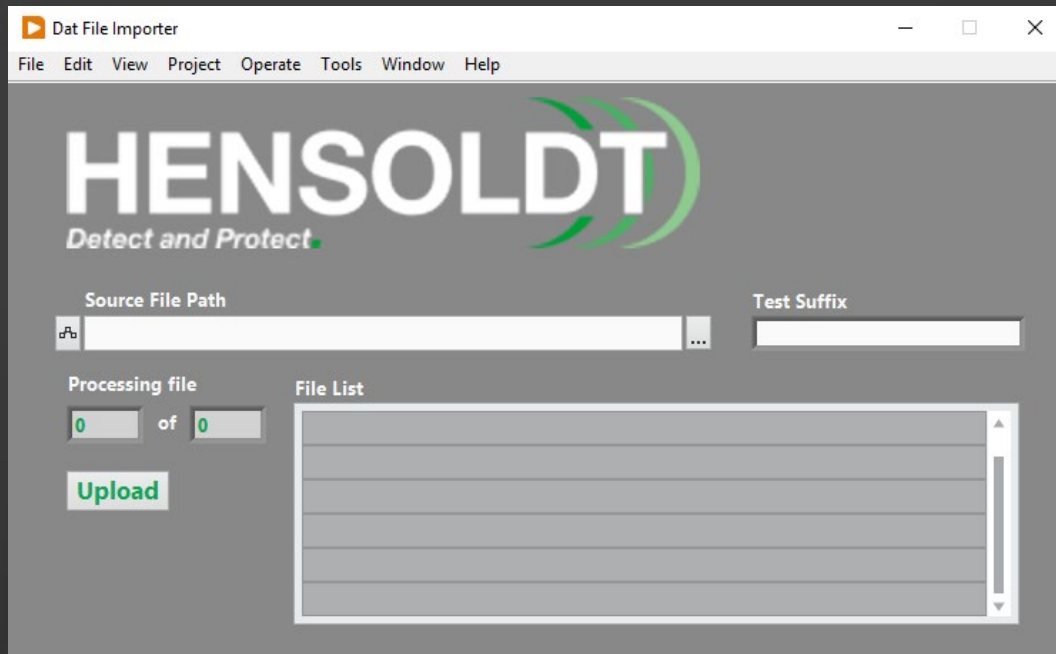

Data Transportation includes:

- Tools to collect asset and configuration relevant data on data generation level
- Connection to the DAIMsphere server
- Infrastructure to facilitate the transfer of data from data source to the server in areas without direct network access or sensitive data handling areas including export, sanitization and upload tools

# Data Transportation: Legacy data conditioning tool

Example: .dat file conversion and server upload @ HENSOLDT

- .dat files are a legacy file format used @ HENSOLDT
- Test data is parsed and uploaded using the REST API interface
- Test data is in a standardized and correlating format

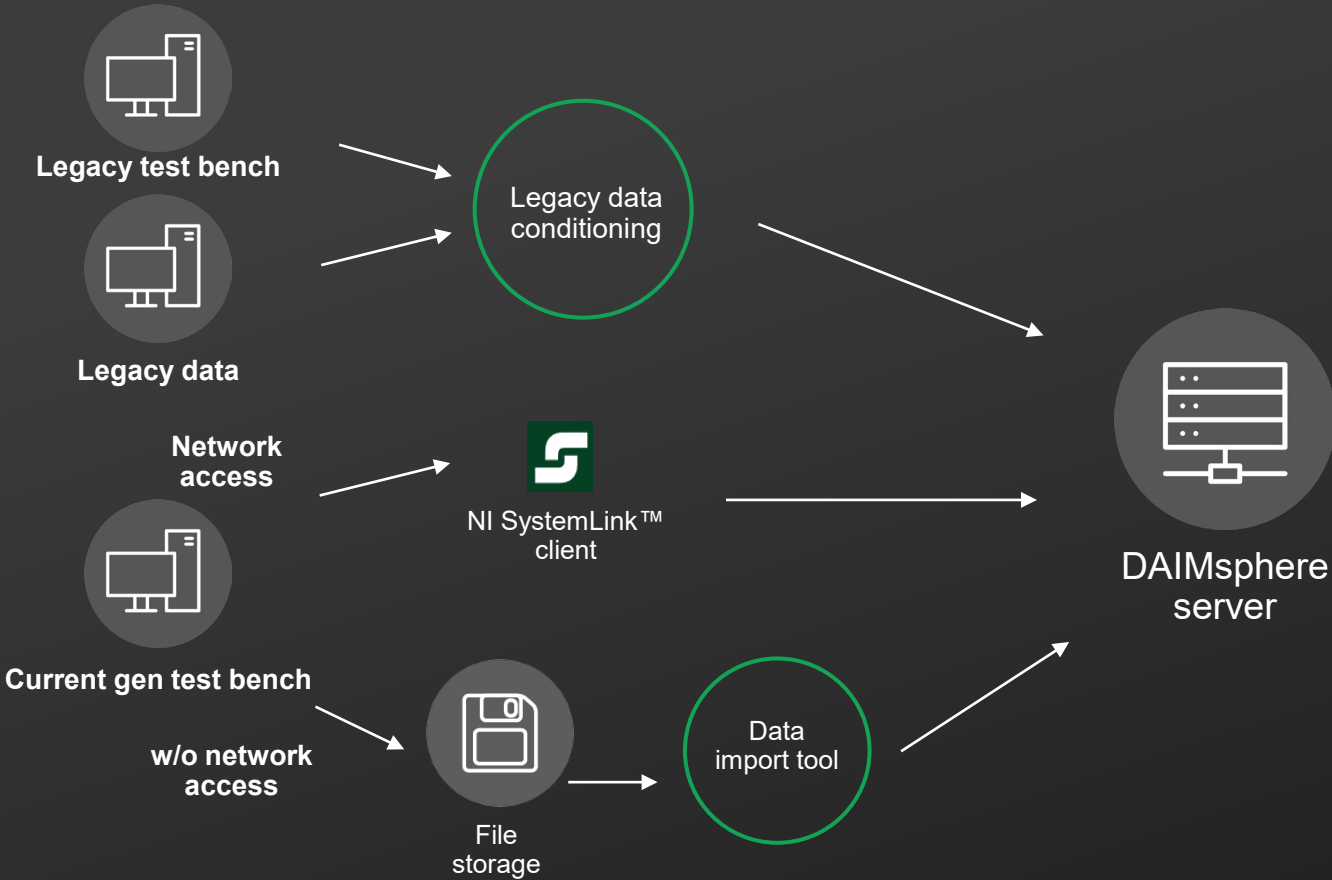

DAIMsphere  
Server

# Data Transportation

Infrastructure to collect data from multiple sources

Data Transportation includes:

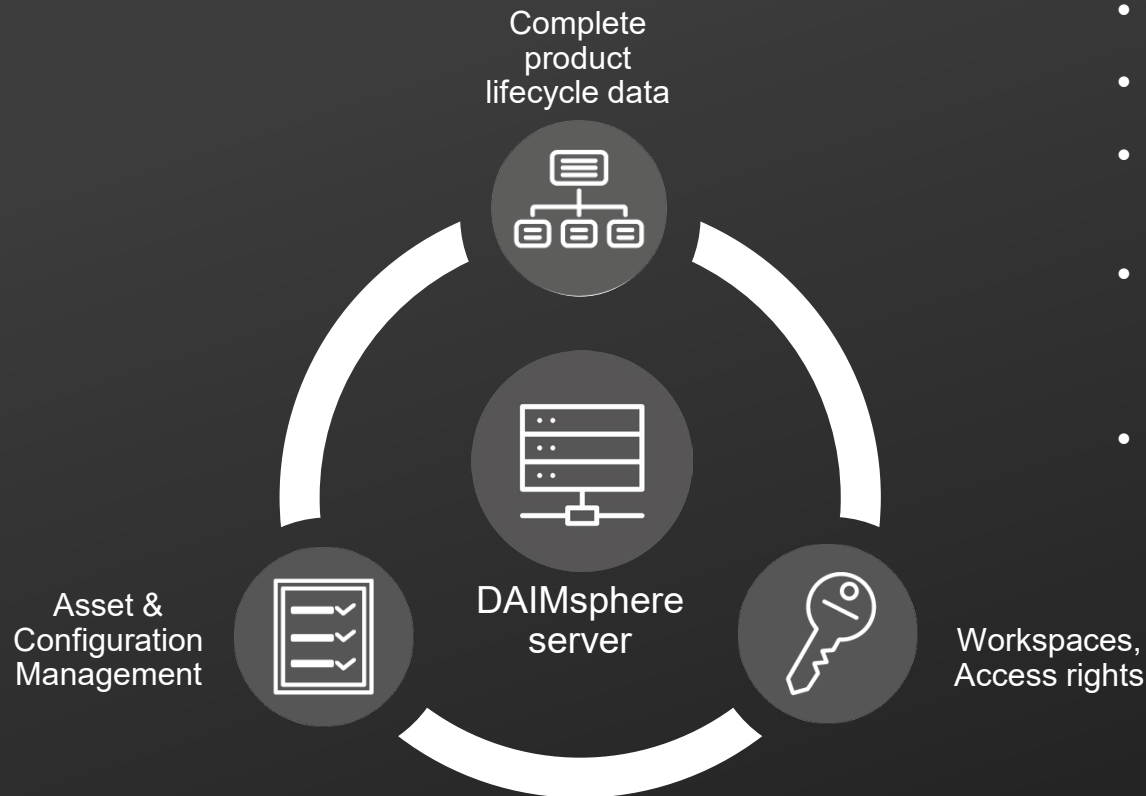

- Tools to collect asset and configuration relevant data on data generation level
- Connection to the DAIMsphere server
- Infrastructure to facilitate the transfer of data from data source to the server in areas without direct network access or sensitive data handling areas including export, sanitization and upload tools

# Live Demonstration – Data Transportation

# Data Aggregation

Creation of a centralized secure test data infrastructure

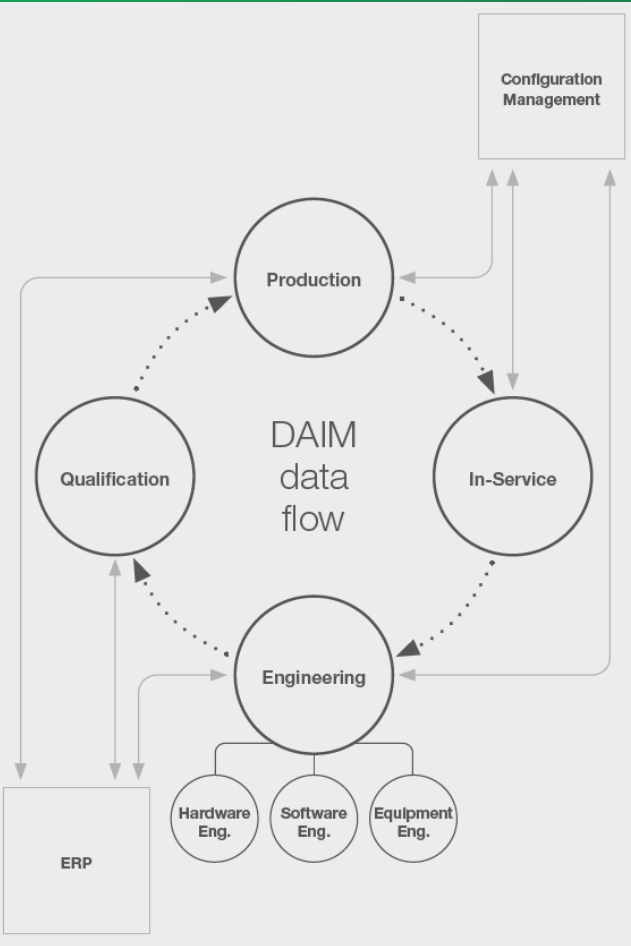

- Precondition to enable data correlation
- Traceability of test system configurations
- Data correlation feasibly across multiple product hierarchies
- Separation of data into workspaces with role based access and rights management to be compliant with the need to know principle
- Asset management

# Data Analysis

Real data driven decisions

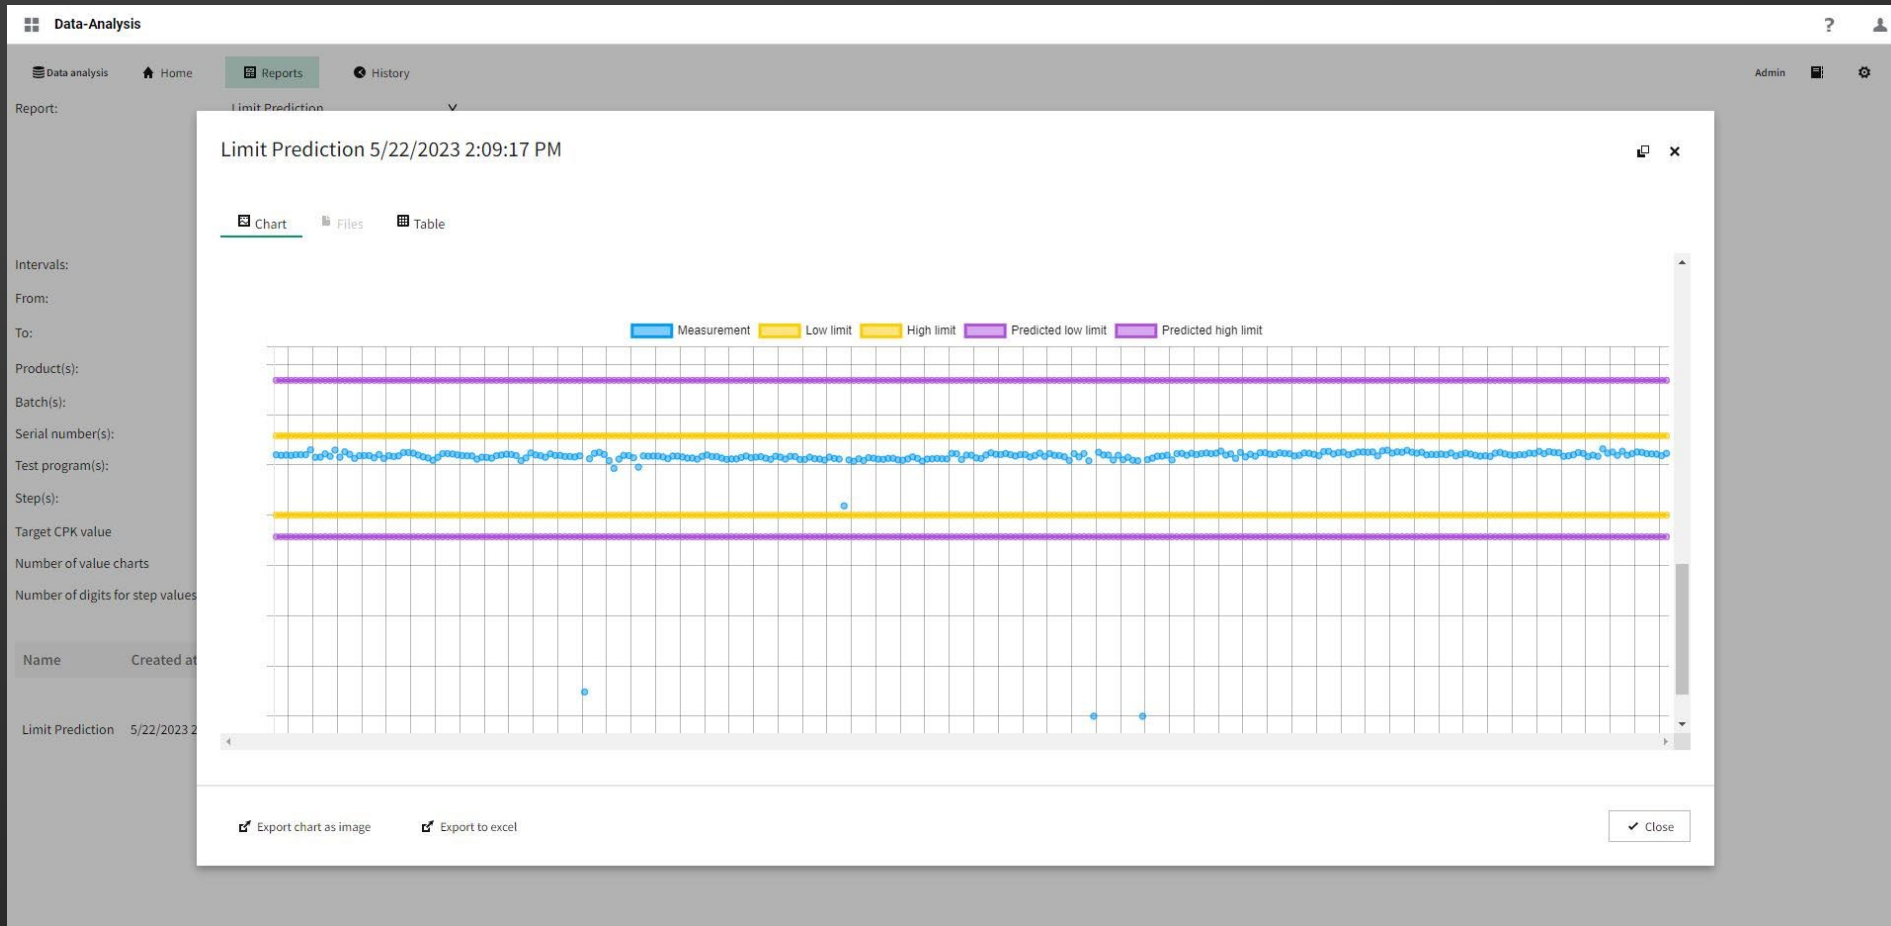

- Custom analysis routines covering the entire data lifecycle
- Instantaneous automated analysis e.g. automated tester verification, limit verification & detection of failure clusters
- Real-time monitoring and reporting of test data
- Statistical verification of testing parameters during production ramp up using limit simulation
- Monitoring of process stability (SPC)
- Support in planning obsolescence removal

# Live Demonstration – Data Analysis

# Real Data

## Example 1 for Limit Prediction

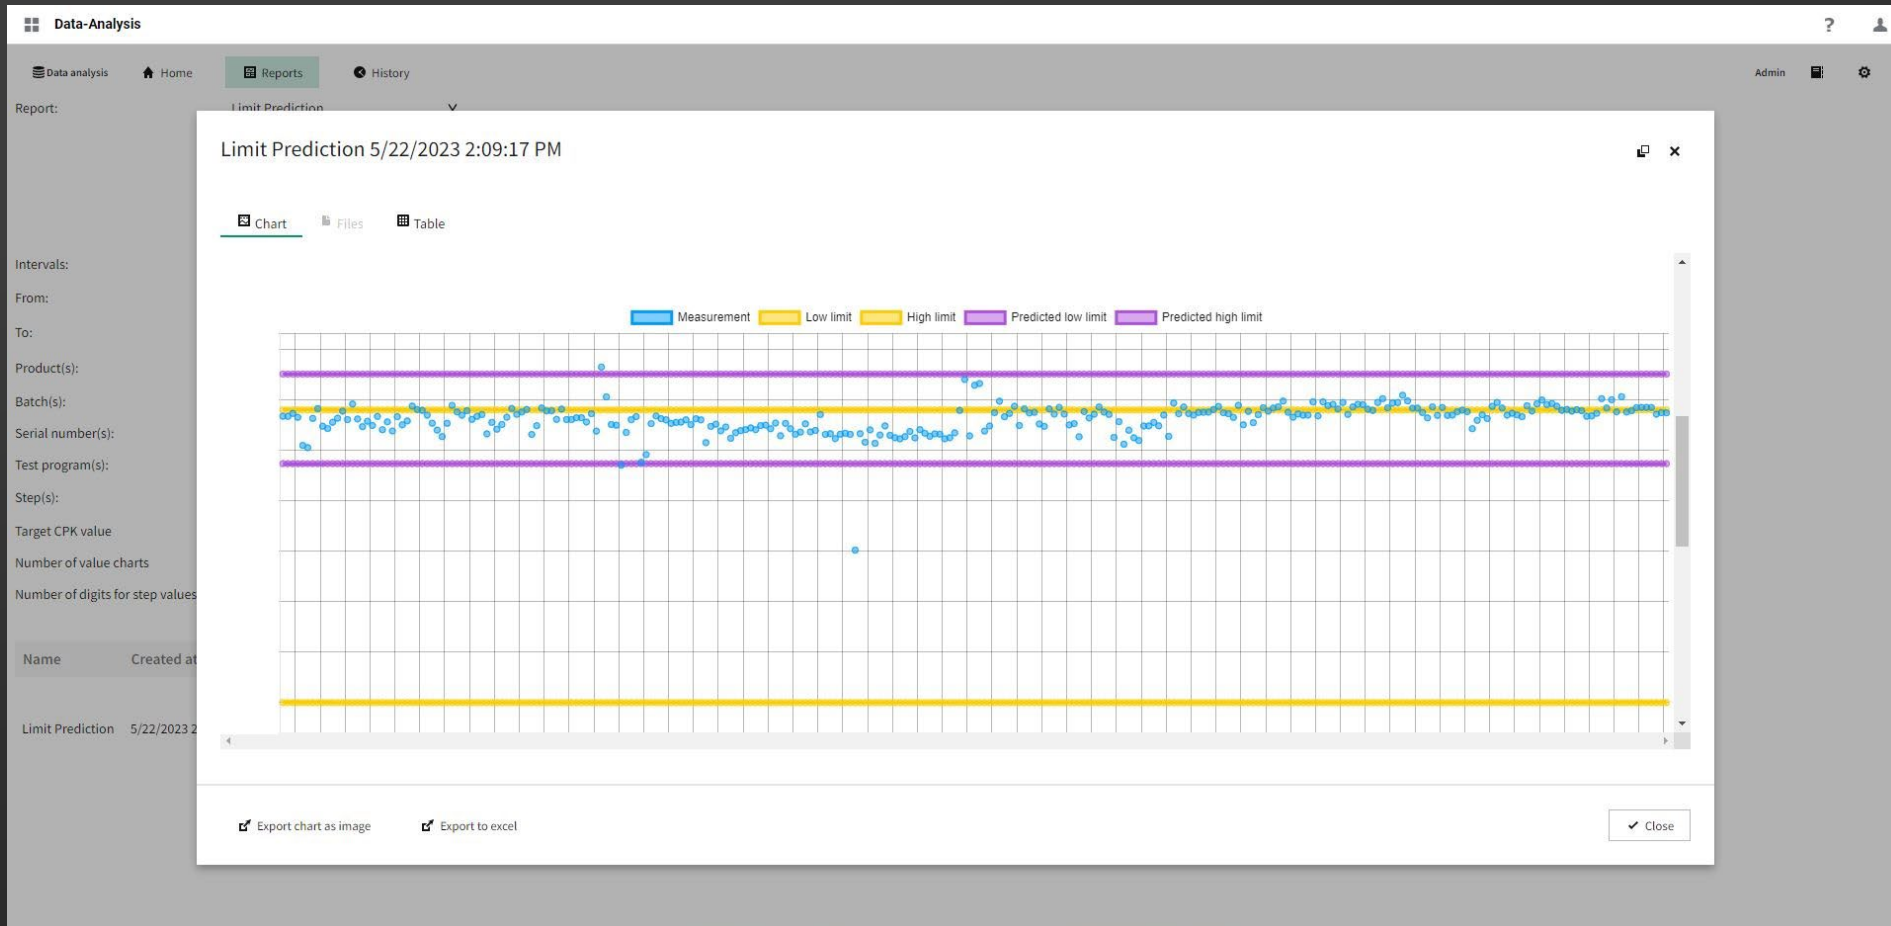

# Real Data

## Example 2 for Limit Prediction

# Real Data

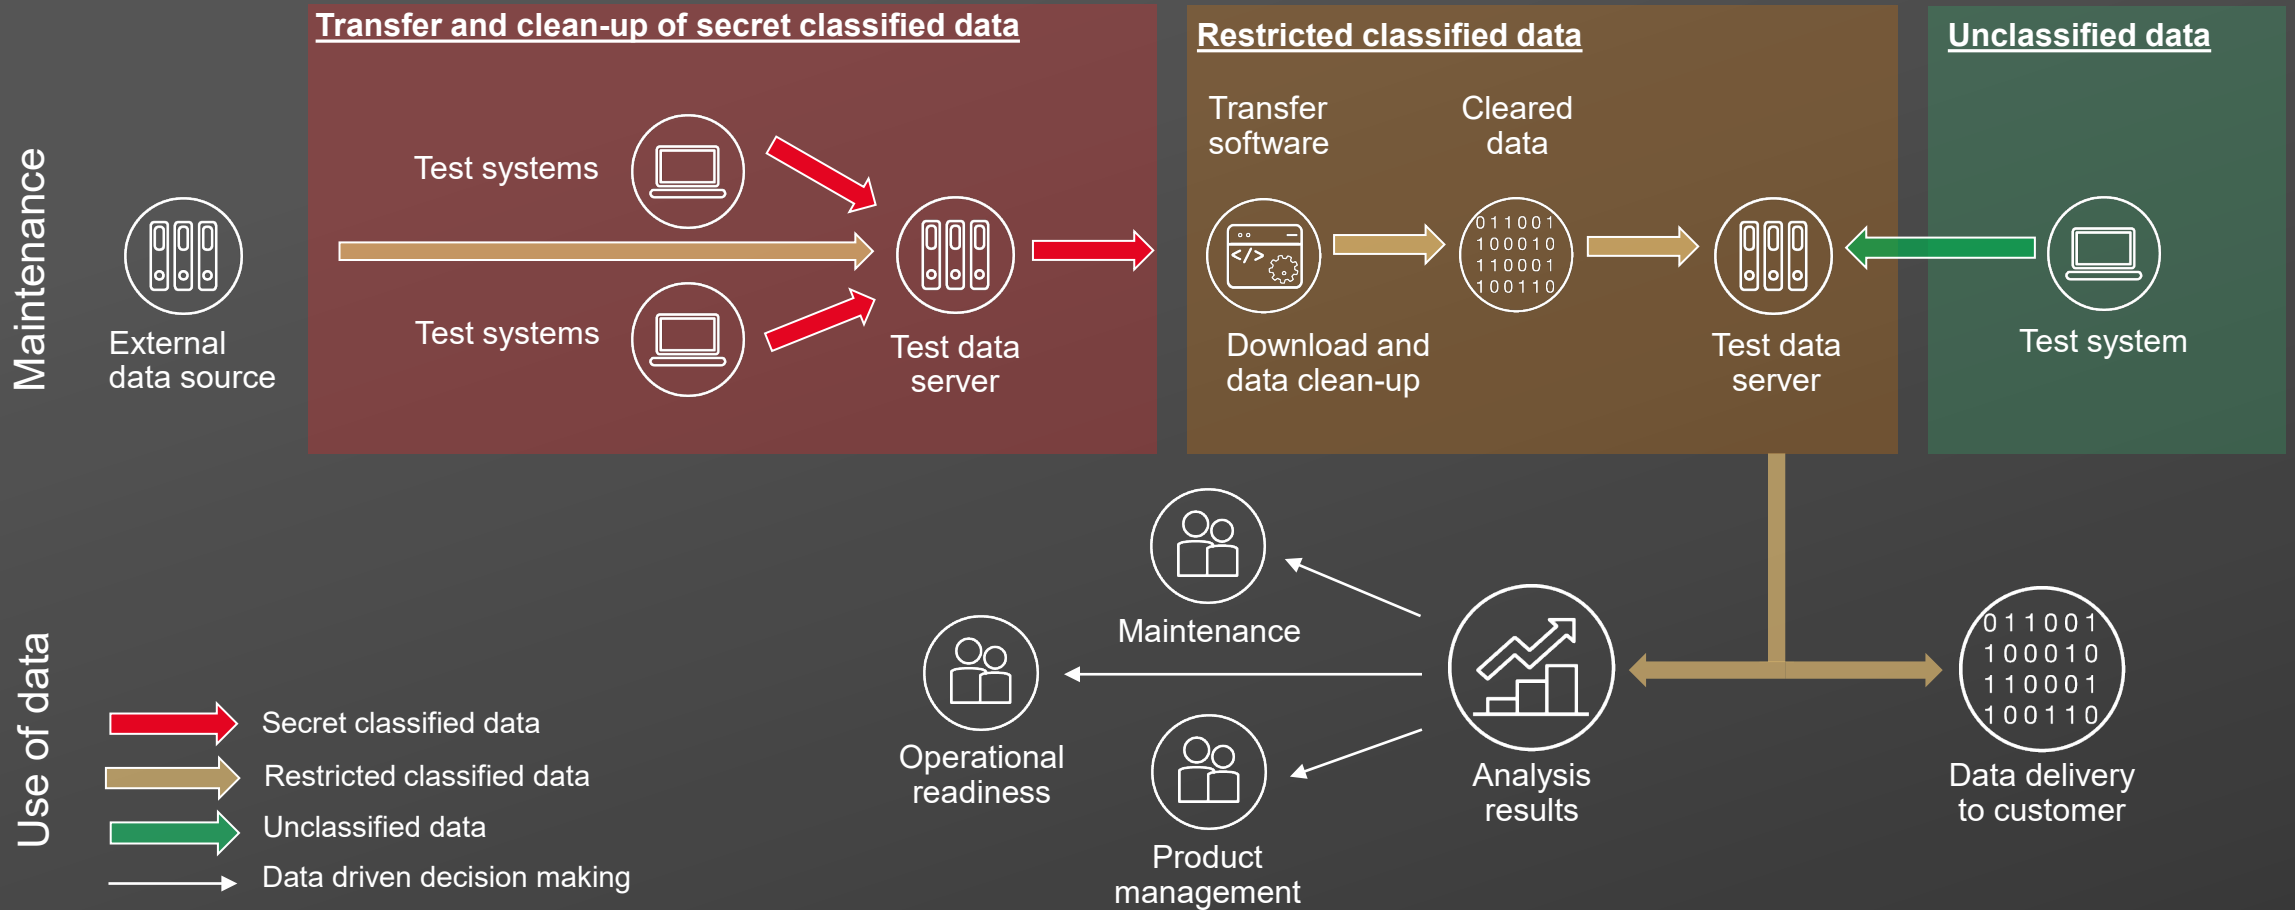

## Example 3 for Limit Prediction

# DAIMsphere: The Value Proposition

# Test Data Management along the Product Life Cycle

Provision and interpretation of data across departments and security levels

# Live Demonstration – Data Transfer between Security Levels

# Test Data Management along the Product Life Cycle

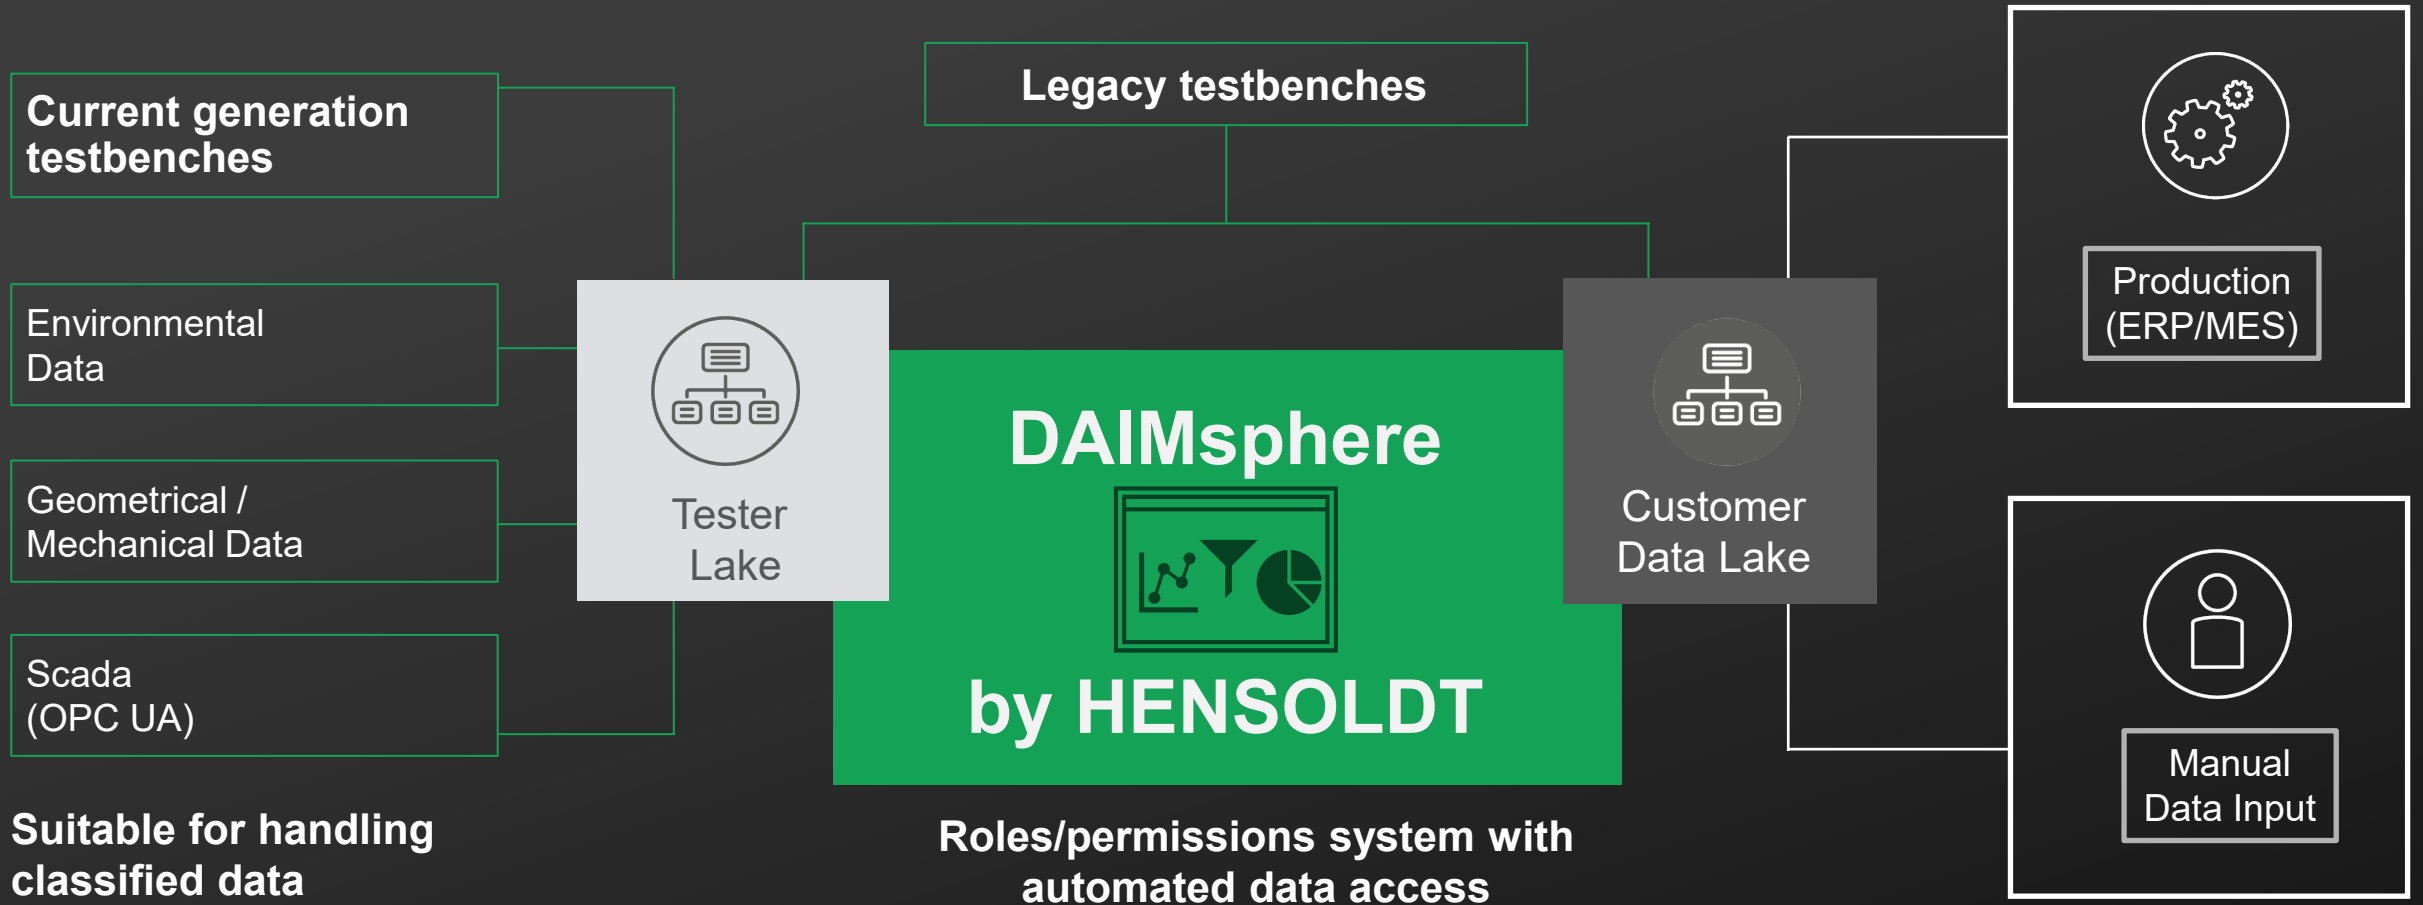

Provision and interpretation of data across departments and security levels

**The integration of DAIMsphere leads to valuable benefits:**

- ✓ Concurrent engineering through real-time monitoring of test data
- ✓ Business value through reduced cost of non-quality
- ✓ Operational value with process stability, digitalisation and IT security across the board
- ✓ Data export capabilities

# DAIMsphere for Testing Solutions

A commercially available IIoT solution based on SystemLink™
